**RE: DNAPL RECOVERY ACTIVITIES QUARTERLY REPORT – 1<sup>ST</sup> QUARTER 2024  
UNION PACIFIC RAILROAD HOUSTON WOOD PRESERVING WORKS FACILITY  
4910 LIBERTY ROAD FACILITY, HOUSTON, TEXAS  
POST-CLOSURE CARE PERMIT NO. HW-50343; INDUSTRIAL SWR NO. 31547**

Dear Mr. Wick:

WSP USA Inc. (WSP), on behalf of Union Pacific Railroad Company (UPRR), submits this 1<sup>st</sup> Quarter 2024 summary report for the dense non-aqueous phase liquid (DNAPL) recovery activities conducted at the UPRR Houston Wood Preserving Works Facility (the Site).

**DNAPL Recovery Summary – 1<sup>st</sup> Quarter 2024**

Below is a summary of the DNAPL recovery activities for the 1<sup>st</sup> Quarter 2024:

- Seven recovery wells (MW-12B, MW-32B, MW-41B, MW-49A, MW-70B, MW-74B, and MW-75B) exhibited measurable DNAPL (greater than a trace) during at least one of the six semi-monthly events during the 1<sup>st</sup> Quarter 2024. DNAPL was recovered from these seven wells during the 1<sup>st</sup> Quarter 2024. Wells MW-12B and MW-41B exhibited recoverable DNAPL during each event, but the groundwater/DNAPL interface was not measurable as it remained below the dedicated pumps in both wells. No more than a trace of DNAPL was measured in 9 wells (MW-23C, MW-33BR, MW-34CR, MW-45C, MW-46C, MW-57A, MW-57B, MW-68B, and MW-78A) with no recovery from these wells during the 1<sup>st</sup> Quarter. Well MW-44C is damaged and no NAPL measurements or recovery was able to be conducted at that well. Well MW-49B was not measured or sampled during the 1<sup>st</sup> Quarter 2024 due to a trailer obstructing well access.
- Approximately 5.8 gallons of DNAPL were recovered during the 1<sup>st</sup> Quarter 2024.

**DNAPL Recovery Procedures**

As detailed in the Response Action Plan (RAP) dated November 24, 2014, a 24-month DNAPL recovery pilot test, consisting of manual DNAPL recovery from selected wells on a monthly basis, was conducted at the Site. Following the 24-month pilot testing period, the DNAPL recovery activities have continued monthly following the same procedures detailed in the RAP. In response to the Texas Commission on Environmental Quality

(TCEQ) Technical Notice of Deficiency dated April 11, 2019, the DNAPL recovery frequency was increased to bi-monthly (twice a month) in June 2019.

The following monitoring wells are part of the current DNAPL recovery activities:

Well Name	Zone
MW-57A	A-TZ
MW-78A	A-TZ
MW-12B	B-TZ
MW-32B	B-CZ
MW-33BR	B-CZ
MW-41B	B-TZ
MW-49A	A-TZ
MW-49B	B-CZ
MW-57B	B-CZ
MW-68B	B-TZ
MW-70B	B-CZ
MW-74B	B-TZ
MW-75B	B-CZ
MW-23C	C-TZ
MW-34CR	C-TZ
MW-44C	C-TZ
MW-45C	C-TZ
MW-46C	C-TZ

The locations of the DNAPL recovery wells are shown on Figure 1.

DNAPL recovery activities consist of measuring the depth to groundwater surface, the depth to groundwater/DNAPL interface, and the total depth of the well relative to the top of casing prior to DNAPL recovery. DNAPL recovery from each well is then performed using a peristaltic pump or submersible pump. Beginning in October 2019, the DNAPL encountered in MW-12B and MW-41B was too thick for the submersible pump to efficiently recover. Two stainless steel pneumatic pulse pumps (gas displacement pumps) from QED Environmental Systems (Model LP1301) were installed in MW-12B and MW-41B on March 30, 2020. These pumps are designed for recovering the more viscous liquids observed in these wells. DNAPL is pumped from the bottom of each well until groundwater returns in the pump discharge. The volume of recovered DNAPL is estimated from each well based on the volume pumped, and the well is gauged to measure the total depth of the well and depth to DNAPL following pumping. Recovered DNAPL from all the wells is consolidated into a 55-gallon drum and temporarily stored at the Containment Storage Area at the site pending disposal at TCEQ-permitted facilities including the Clean Harbors Deer Park Facility in La Porte, Texas or the US Ecology Robstown Facility in Robstown, Texas. The most recent waste manifest for the disposal of recovered DNAPL and groundwater is provided in Attachment 1.

### **3<sup>rd</sup> and 4<sup>th</sup> Quarter 2022 DNAPL Well Redevelopment**

Of the wells currently listed in the table above as DNAPL recovery wells, 14 were redeveloped in August and October 2022. Details of the redevelopment were provided in the 4<sup>th</sup> quarter 2022 DNAPL Recovery Activities Report.

## **1<sup>st</sup> Quarter 2024 DNAPL Well Redevelopment**

WSP redeveloped wells MW-34CR and MW-45C in early 2024 as these wells were found to have missing well lids in October 2023. WSP replaced the well lids redeveloped the two wells prior to the sitewide semi-annual sampling event in January/February 2024.

The redevelopment activities were conducted on January 15 and February 5, 2024. WSP personnel redeveloped wells MW-34CR and MW-45C using pumping and surging techniques. The purging and surging techniques were conducted using either an electric submersible pump or rigid HDPE tubing with a check valve at the bottom of the tubing. The pump or HDPE tubing was lower to the bottom of the well and then raised and lowered rapidly to disturb and pump out the sediment from the bottom of the well.

## **1<sup>st</sup> Quarter 2024 DNAPL Recovery Activities**

A summary of the DNAPL recovery measurements from February 2013 through March 2024 is provided in Table 1. DNAPL thicknesses listed on the table and referenced in this letter are “in-well thicknesses”. A graph of DNAPL thicknesses measured prior to each recovery effort over time from February 2013 through March 2024 is presented on Figure 2, with individual graphs for each zone and/or portion of the Site (Figures 3 through 7) discussed below. Observations from the 1<sup>st</sup> Quarter 2024 gauging and recovery activities are provided below for each of the groundwater bearing units (GWBUs):

- **A-TZ Wells**: Recovery wells MW-49A, MW-57A, and MW-78A completed in the A-TZ were evaluated for DNAPL recovery during this period (graph of DNAPL thickness from July 2018 through March 2024 shown on Figure 3).
  - **MW-49A**: Measurable DNAPL was detected during the 1<sup>st</sup> Quarter 2024 on March 22<sup>nd</sup>, measuring 1.0 feet in thickness. Trace amounts of DNAPL was detected but not measurable on February 9<sup>th</sup> and March 7<sup>th</sup>. No DNAPL was measured during the other three recovery events. Approximately 0.5 gallons of DNAPL were recovered from MW-49A during 1<sup>st</sup> Quarter 2024.
  - **MW-57A**: No measurable DNAPL was detected during any of the 1<sup>st</sup> Quarter recovery events; however, a trace amount of DNAPL was detected but not measurable on March 22<sup>nd</sup>. Measurable DNAPL has not been recorded in MW-57A since August 2015. No DNAPL was recovered from MW-57A during 1<sup>st</sup> Quarter 2024.
  - **MW-78A**: No measurable DNAPL was detected during any of the 1<sup>st</sup> Quarter recovery events; however, a trace amount of DNAPL was detected but not measurable on March 22<sup>nd</sup>. Measurable DNAPL has not been detected in this well since December 2020. No DNAPL was recovered from MW-78A during 1<sup>st</sup> Quarter 2024.
- **B-TZ Wells (West Side)**: Recovery wells MW-12B and MW-41B completed in the B-TZ were evaluated for DNAPL recovery during this period (graph of DNAPL thickness from July 2018 through March 2024 shown on Figure 4).

**MW-12B**: During the 1<sup>st</sup> Quarter 2024 recovery events at MW-12B, the groundwater/DNAPL interface was below the top of the pneumatic pulse pump. As a result, the interface probe could not get past the pump assembly, and it was not possible to record a DNAPL thickness in the well. The pump length is approximately 1.55 feet. Based on the measured length of the

pump assembly, the assumption is that there is less than approximately 1.5-2 feet of DNAPL in the well. Approximately 0.5 gallons of DNAPL were recovered from MW-12B using the pneumatic pump during the 1<sup>st</sup> Quarter 2024.

- **MW-41B:** Similar to MW-12B, the top of the groundwater/DNAPL interface in MW-41B was below the top of the pneumatic pulse pump during the 1<sup>st</sup> Quarter 2024. Based on measured length of the pump assembly, the assumption is there is less than approximately 1.5-2 feet of DNAPL in the well. Approximately 2.3 gallons of DNAPL were recovered from MW-41B using the pneumatic pump during the 1<sup>st</sup> Quarter 2024.
- **B-TZ/B-CZ Wells (North (on-site and off-site)):** Recovery wells MW-32B, MW-33BR, MW-57B, MW-68B, and MW-70B completed in either the B-TZ or B-CZ on the north side of the Site or off-site to the north were evaluated for DNAPL recovery during this period (graph of DNAPL thickness from July 2018 through March 2024 shown on Figure 5).
  - **MW-32B (off-site):** Following the redevelopment of MW-32B during the 3<sup>rd</sup> Quarter 2022, DNAPL thickness observed in the well increased in October 2022 but has since shown a decline through the 1<sup>st</sup> Quarter 2024. DNAPL thickness decreased relative to the 4<sup>th</sup> Quarter 2023 during the 1<sup>st</sup> Quarter 2024 recovery events. During the DNAPL recovery event on January 13, 2023, DNAPL thickness was measured at 6.76 feet. By March 22, 2024, the DNAPL thickness decreased to 1 foot. Approximately 0.55 gallons of DNAPL were recovered from MW-32B during the 1<sup>st</sup> Quarter 2024.
  - **MW-33BR (off-site):** No measurable DNAPL was detected during any of the 1<sup>st</sup> Quarter recovery events, however, a trace amount of DNAPL was detected but not measurable on February 9<sup>th</sup>. This was the second observation of DNAPL in this well. No DNAPL was recovered from MW-33BR during 1<sup>st</sup> Quarter 2024.
  - **MW-57B (on-site):** No measurable DNAPL was detected during any of the 1<sup>st</sup> Quarter recovery events, however, a trace amount of DNAPL was detected but not measurable during each of the DNAPL recovery events. No DNAPL was recovered from MW-57B during 1<sup>st</sup> Quarter 2024.
  - **MW-68B (off-site):** No measurable DNAPL was detected during any of the 1<sup>st</sup> Quarter recovery events, however, a trace amount of DNAPL was detected but not measurable on January 11<sup>th</sup>, February 22<sup>nd</sup>, March 9<sup>th</sup>, and March 22<sup>nd</sup>. No DNAPL was recovered from MW-68B during 1<sup>st</sup> Quarter 2024.
  - **MW-70B (off-site):** DNAPL thickness levels fluctuated during 1<sup>st</sup> Quarter 2024. DNAPL thickness measurements ranged from trace amounts on January 11<sup>th</sup>, February 9<sup>th</sup>, and March 7<sup>th</sup>, to 1.0 feet on January 25<sup>th</sup>, 3.0 feet on February 9<sup>th</sup>, and 1.0 feet on March 22<sup>nd</sup>. During the 1<sup>st</sup> Quarter 2024, 0.7 gallons of DNAPL was recovered from MW 70B.
- **B-TZ/B-CZ Wells (Englewood Intermodal Yard):** Recovery wells MW-49B, MW-74B, and MW-75B in the Englewood Intermodal Yard completed in the B-CZ and B-TZ were evaluated for DNAPL recovery during this period (graph of DNAPL thickness from July 2018 through March 2024 shown on Figure 6).

- **MW-49B:** During the 1<sup>st</sup> Quarter 2024, MW-49B was not accessible due to a field trailer obstructing access to the well. No measurements or sampling have occurred from November 2023 to March 2024 due to the obstruction. Even though the well was redeveloped in August 2022, recent total depth measurements at MW-49B have been approximately 7 feet shallower than the well construction depth and suggest that the well has an obstruction or casing failure. The well will be plugged, abandoned, and replaced at a later date.
  - **MW-74B:** During the 1<sup>st</sup> Quarter 2024, thicknesses ranged from a trace amount on January 11<sup>th</sup> to 1.0 feet on January 25<sup>th</sup>. Approximately 0.3 gallons of DNAPL were recovered from MW-74B during the 1<sup>st</sup> Quarter 2024.
  - **MW-75B:** No DNAPL was detected during the January 2024 events and only a trace amount was detected on March 22<sup>nd</sup>. Measurable DNAPL was detected in MW-75B during the 1<sup>st</sup> Quarter recovery events, measuring 2 feet on February 9<sup>th</sup>, 0.5 feet on February 22<sup>nd</sup>, and 1 foot on March 7<sup>th</sup>. These were the first three instances of measurable DNAPL detected in this well since August 2021. A total of 0.9 gallons of DNAPL were recovered from MW-75B during the 1<sup>st</sup> Quarter 2024.
- **C-TZ Wells:** Wells MW-23C, MW-34CR, MW-44C, MW-45C, and MW-46C completed in the C-TZ were evaluated for DNAPL recovery (graph of DNAPL thickness from July 2018 through March 2024 shown on Figure 7).
    - **MW-23C:** No DNAPL was detected nor recovered from this well during the six recovery events for the 1<sup>st</sup> Quarter 2024, however, a trace amount of DNAPL was detected but not measurable on March 22<sup>nd</sup>. Measurable DNAPL has not been detected in MW-23C since February 2022.
    - **MW-34CR:** In May 2014, replacement well MW-34CR was installed and gauged as part of the recovery program. However, no DNAPL has been detected in this well. No DNAPL was observed during the well redevelopment on August 30, 2022 or on February 5, 2024. Given the absence of DNAPL in this well, a graph for MW-34CR is not included in Figure 7.
    - **MW-44C:** No measurable DNAPL had been detected in MW-44C from June 2019 (trace DNAPL noted in mid-June 2019) through May 2020. DNAPL was noted (0.39 feet thick) in MW-44C at the end of May 2020. However, the total depth measurement at MW-44C was approximately 10 feet higher than the well construction depth, suggesting that the well had appeared to have silted up. MW-44C was re-developed on July 24, 2020 during the site-wide monitoring activities. Over 10 feet of silt was removed, and the final measured depth of the well was within a foot of the original total depth. During the next recovery event in early August, the well appeared to have silted up again. Redevelopment was attempted a second time on October 1, 2020, but it was unsuccessful. MW-44C was not included in the August 2022 well redevelopment activities. The well will be plugged, abandoned, and replaced with a proposed recovery well as detailed in the RAP dated August 31, 2020.

- **MW-45C:** No DNAPL was detected from this well during five of the six 1st Quarter 2024 recovery events. A trace amount of DNAPL was observed in MW-45C on February 9<sup>th</sup>. No measurable DNAPL has been recorded in MW-45C since March 2022.
- **MW-46C:** No DNAPL was detected from this well during four of the six 1<sup>st</sup> Quarter 2024 recovery events. A trace amount of DNAPL was observed in MW-46C on February 9<sup>th</sup> and March 22<sup>nd</sup>. No measurable DNAPL has been recorded in MW-46C since May 2019.

DNAPL Recovery: From February 2013 to March 2024, an estimated 1,082 gallons of creosote DNAPL have been recovered from the wells at the Site. Monthly DNAPL recovery volumes increased after the January 2015 event due to a change in pumping techniques. Recovery volumes began to decline in 2020 and decreased significantly beginning in September 2021. Eleven of the wells were redeveloped in August 2022 and two additional wells were redeveloped in October 2022. Following the redevelopment, DNAPL recovery volumes increased. Well development of two wells occurred in January/February 2024 prior to the sitewide semi-annual groundwater sampling event. No changes in DNAPL recovery occurred after redevelopment. During 1<sup>st</sup> Quarter 2024, an average of 1.0 gallon of DNAPL was recovered per recovery event. DNAPL recovery volumes ranged from approximately 0.4 – 1.6 gallons per semi-monthly event, and approximately 5.8 gallons were recovered during the 1<sup>st</sup> Quarter 2024 (Table 1). UPRR will continue to monitor the DNAPL thicknesses twice per month as discussed in the response to the TCEQ 4<sup>th</sup> Technical Notice of Deficiency (TNOD) letter (April 11, 2019).

If you have any questions or need additional information, please feel free to call us at (512) 220-7459 or Mr. Kevin Peterburs of UPRR at (414) 267-4164.

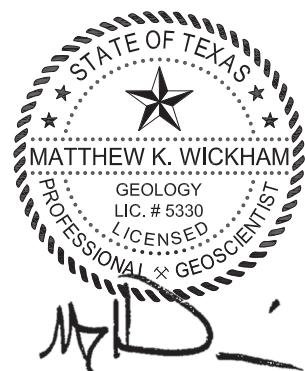

Sincerely,

**WSP USA INC**

<b>Total DNAPL Pumped (gal)</b>				<b>156.9</b>				<b>55.5</b>			<b>148.5</b>	

Notes:

\* - indicates DNAPL and groundwater mixture

MW-23C- added 5 feet to TOC due to capping after 2/3/2016

\*\* - indicates DTD from previous event was used; DNAPL recovered revised based on review of field notes.

--- - No DNAPL pumped

ND - Not detected

DTW - Depth to water (feet Below Top of Casing (BTOC))

NM - Not measured

DTD - Depth to DNAPL (feet BTOC)

PoP - Product on probe, not measurable

MW-12B- TD measured at 46.2 instead of 45.8, August 28, 2015.

TR- Trace amount of DNAPL Extracted

BP - Below pump; depth to DNAPL not measured because DNAPL is below top of in-well pump

TABLE 1

<b>Total DNAPL Pumped (gal)</b>				<b>4.1</b>				<b>64.7</b>			<b>9.5</b>	

\* - indicates DNAPL and groundwater mixture

ND - Not detected

--- - No DNAPL pumped

NM - Not measured

DTW - Depth to water (feet Below Top of Casing (BTOC))

PoP - Product on probe, not measurable

DTD - Depth to DNAPL (feet BTOC)

TR- Trace amount of DNAPL Extracted

<b>Total DNAPL Pumped (gal)</b>				<b>61.8</b>				<b>151.3</b>	<b>1081.8</b>

\* - indicates DNAPL and groundwater mixture

ND - Not detected

--- - No DNAPL pumped

NM - Not measured

DTW - Depth to water (feet Below Top of Casing (BTOC))

PoP - Product on probe, not measurable

DTD - Depth to DNAPL (feet BTOC)

TR - Trace amount of DNAPL Extracted

MW-44C not measured 3/1/18 - 5/1/18; couldn't locate well due to construction. MW-45C not measured 6/16/22-6/30/22; couldn't locate well.

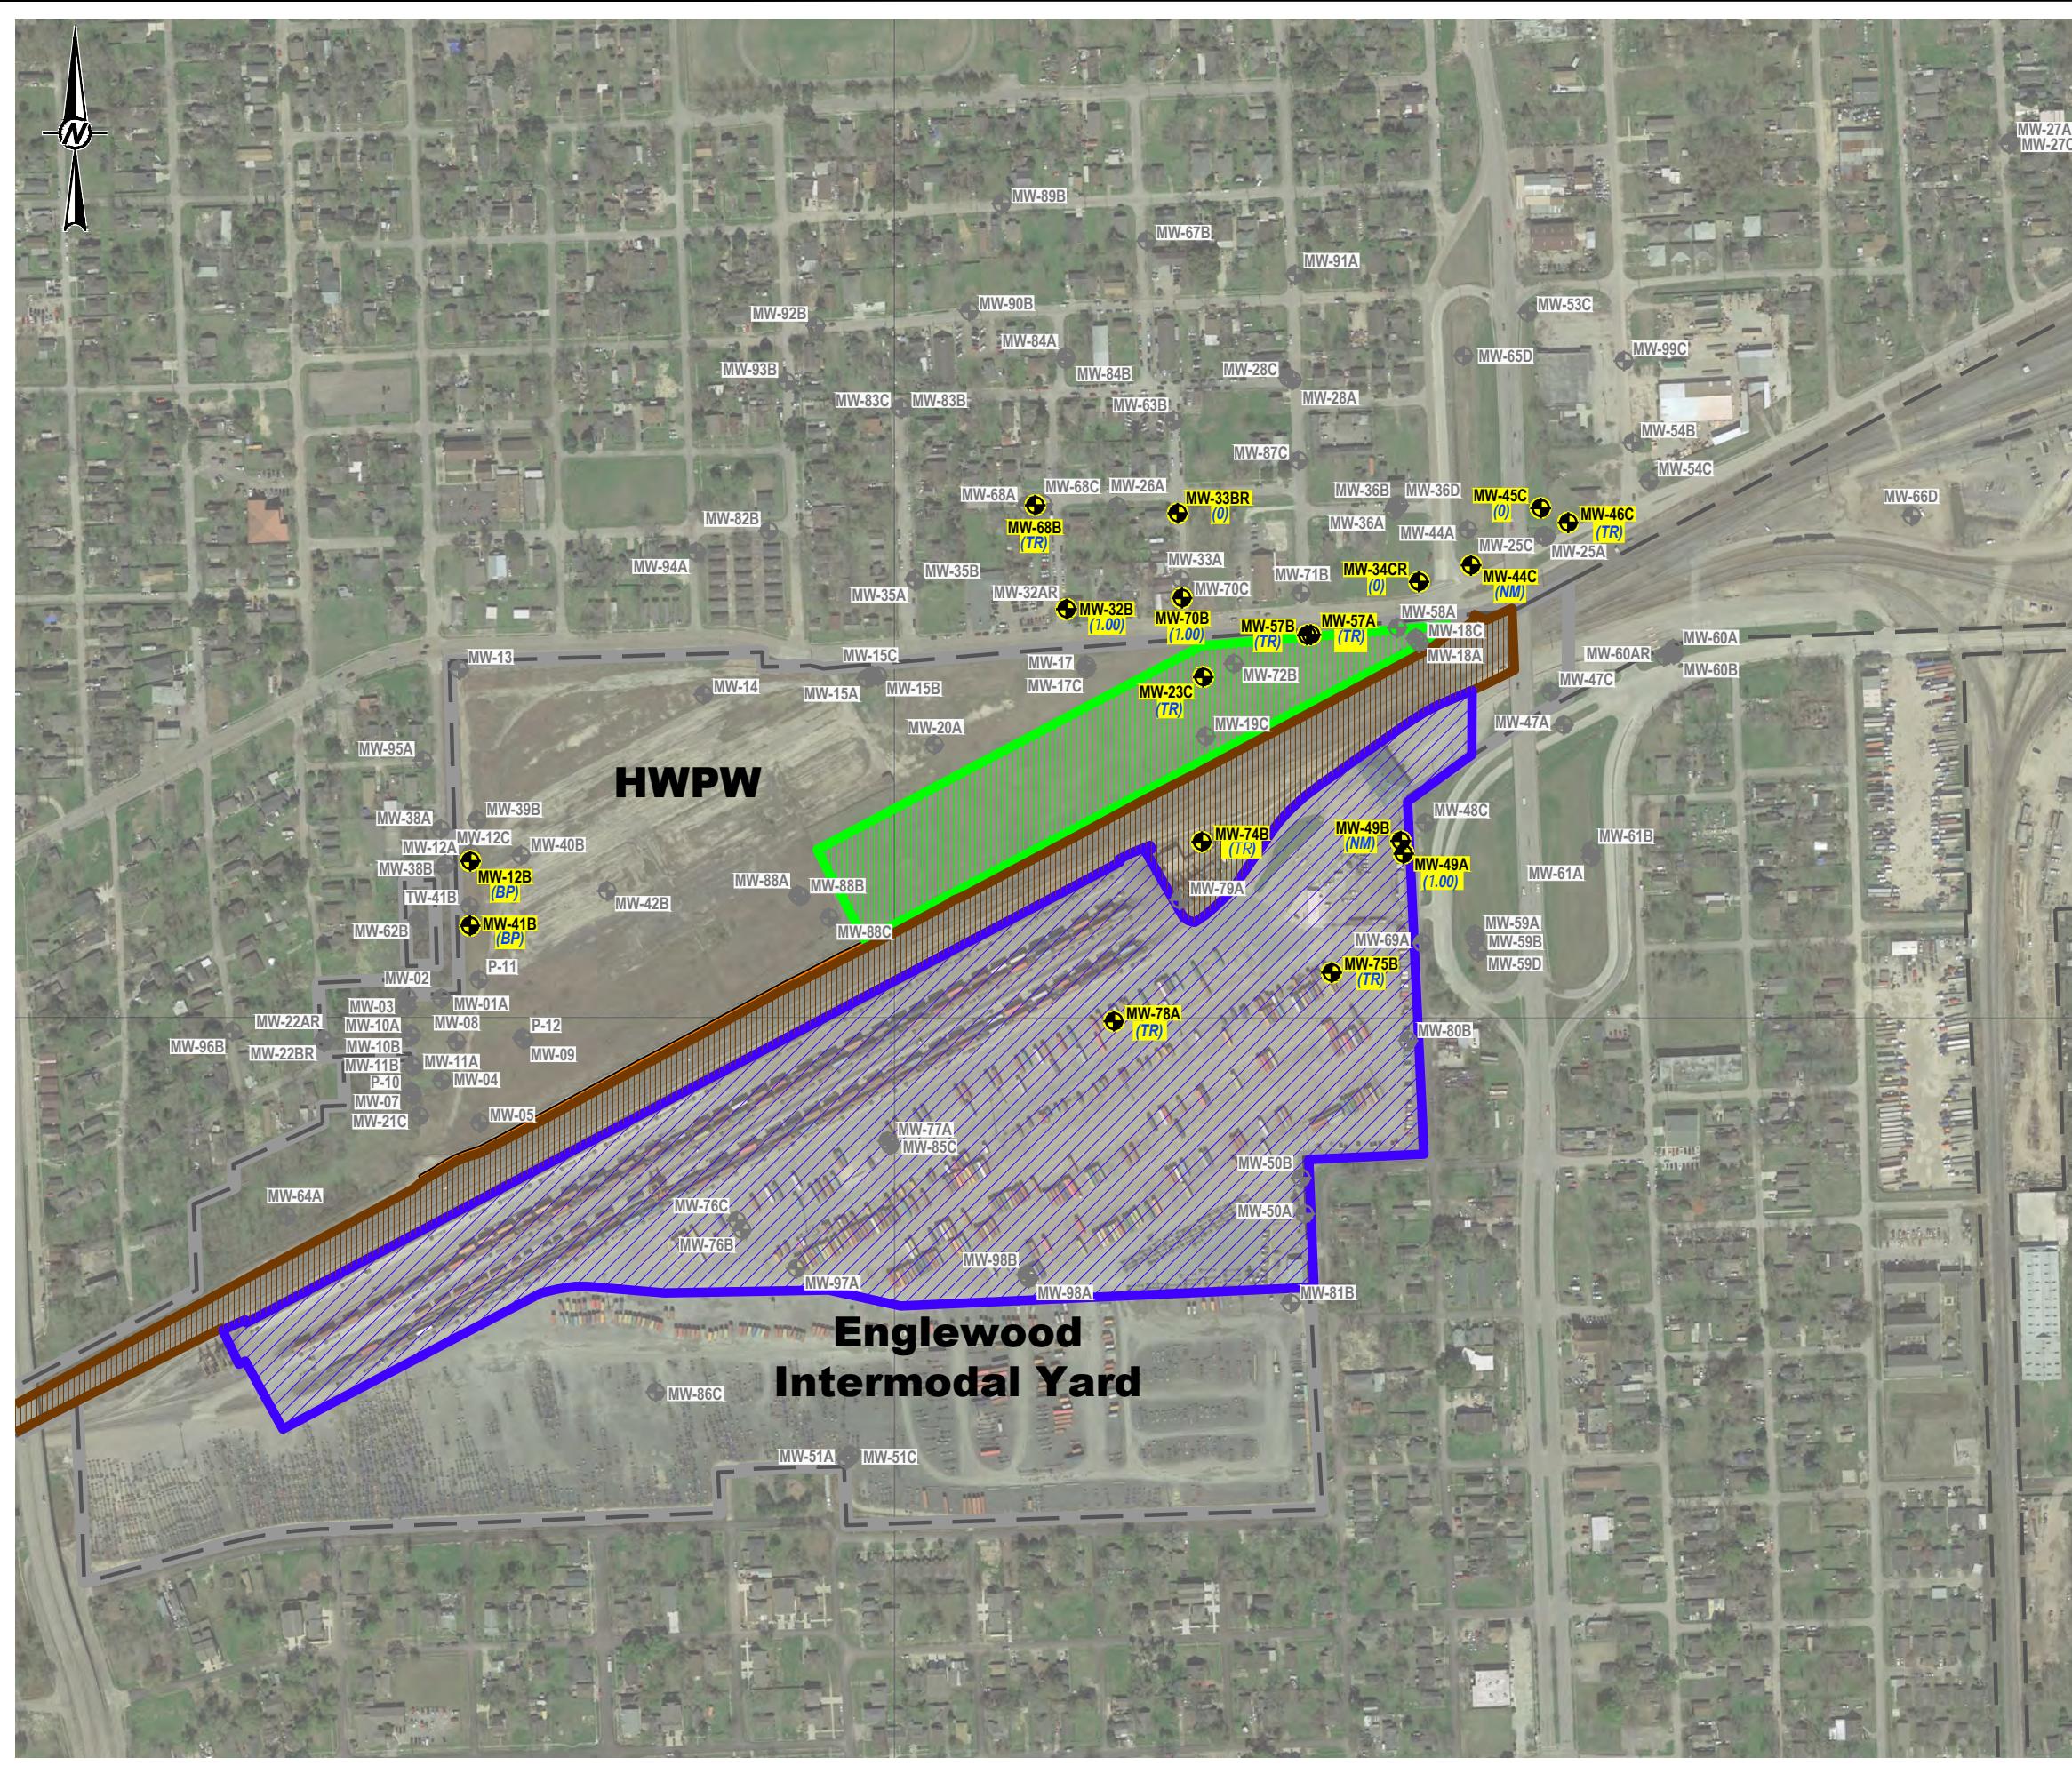

\*\*Total depth measured in MW-44C was approximately 10 ft higher than during previous events - attempted to remove silt in July and October 2020.

MW-49B not measured 11/16/2023-3/22/2024; well inaccessible due to trailer on top of well.

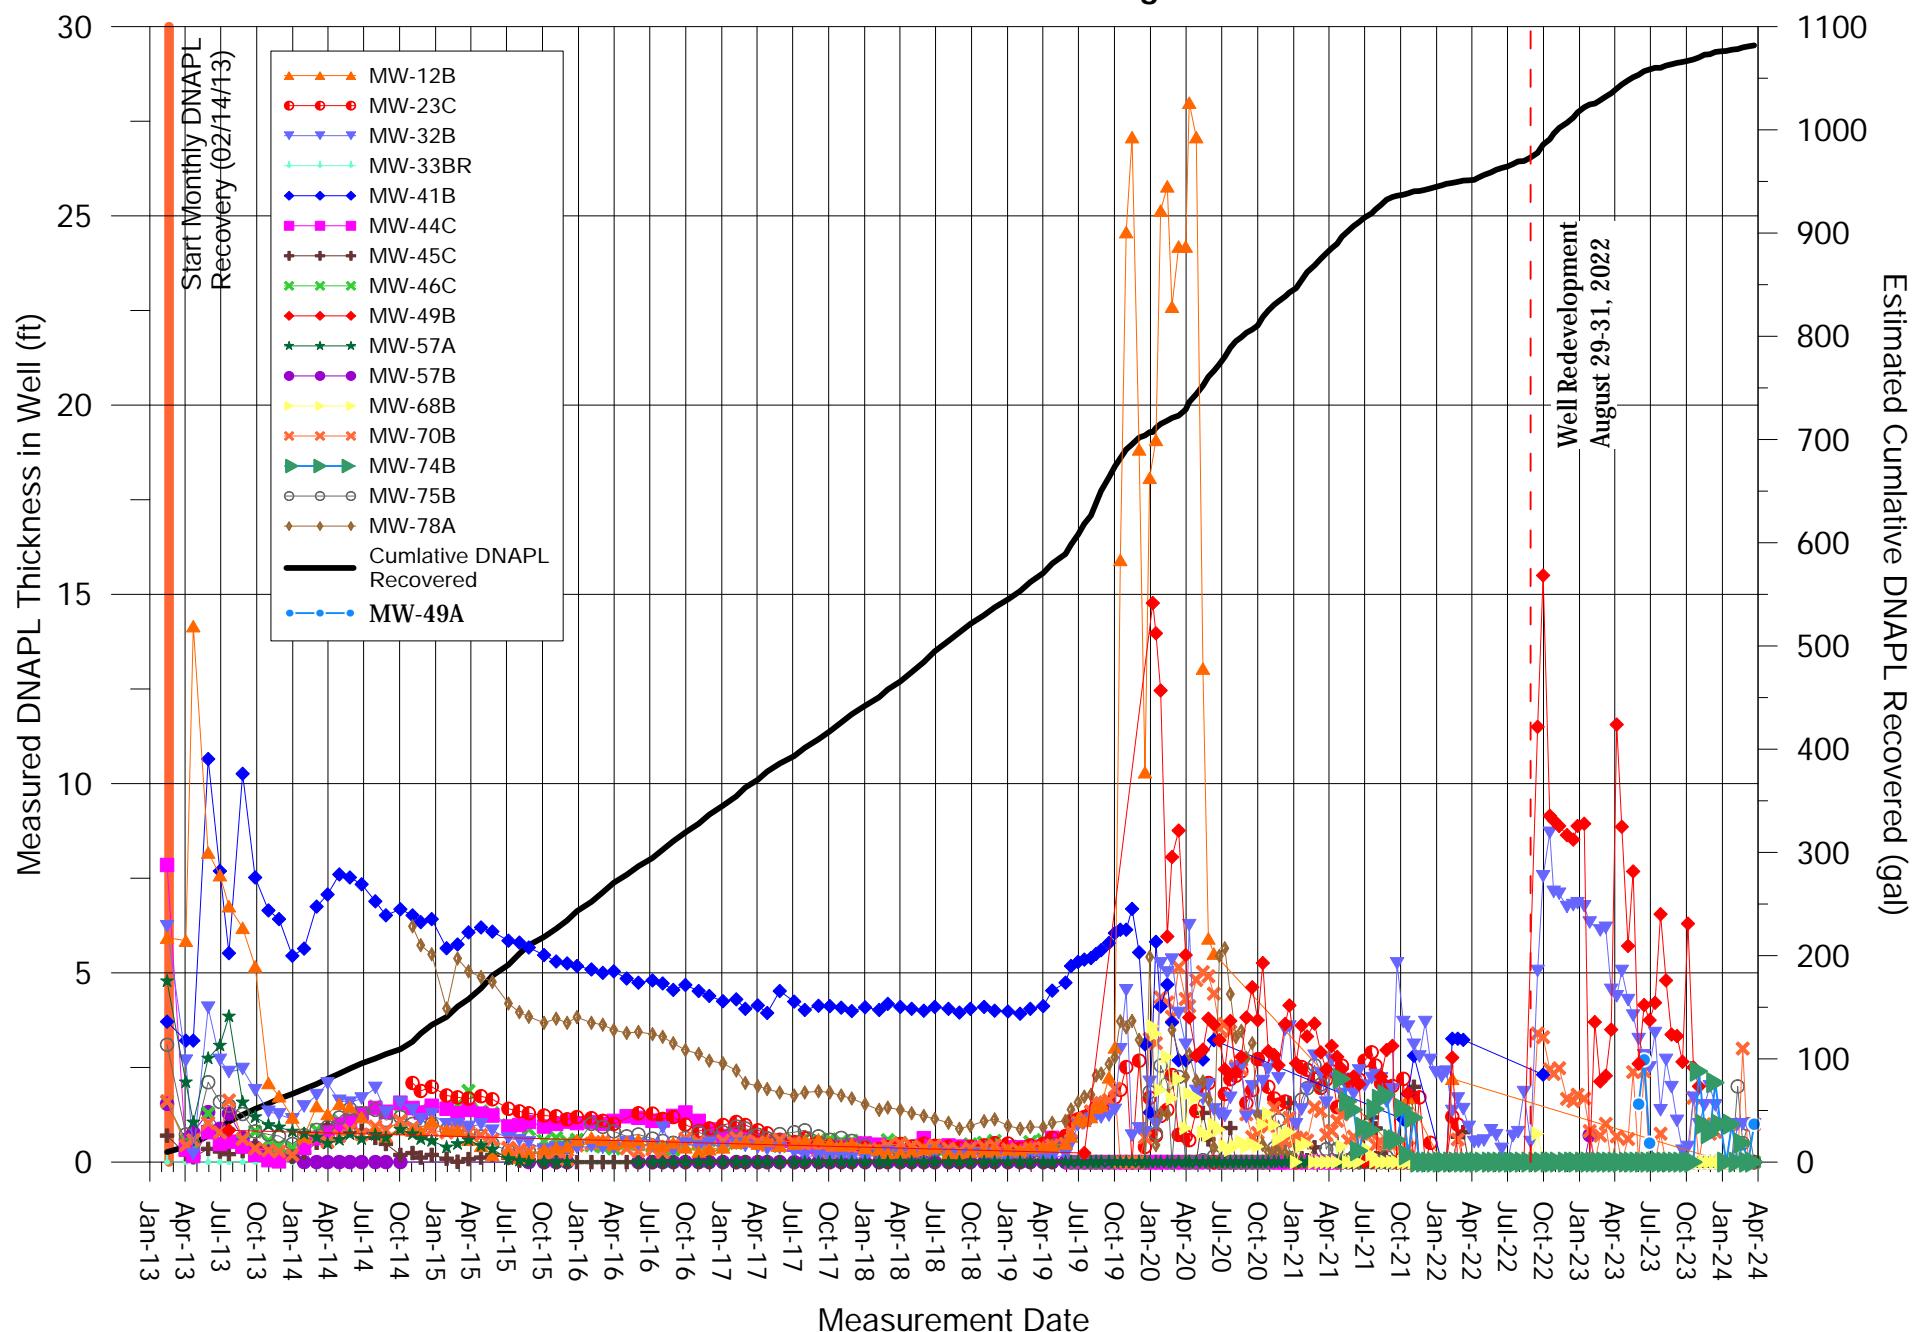

MW-78A not measured 7/1/21, 7/19/21, 9/22/21, 10/20/21; well inaccessible due to container operations.

MW-75B not measured 12/30/21, 10/5/2023; well inaccessible due to container operations.
