SECOND SEMI-ANNUAL 2024 SITE-WIDE GROUNDWATER MONITORING REPORT
HOUSTON WOOD PRESERVING WORKS
HAZARDOUS WASTE PERMIT/COMPLIANCE PLAN NO 50343
SWR 31547

Dear Mr. Wick,

WSP USA Inc. (WSP), on behalf of Union Pacific Railroad (UPRR), prepared the attached Second Semi-Annual 2024 Site-Wide Groundwater Monitoring Report detailing the site-wide groundwater sampling activities conducted in July - September 2024 at the UPRR Houston Wood Preserving Works Facility (the Site) located at 4910 Liberty Road, Houston, Texas. In general, groundwater concentrations in samples collected during this sampling event are consistent with previous sampling events. The results of a plume stability analysis conducted in 2024 demonstrates the groundwater plume is not migrating.

To aid review of the report, we have provided a summary below:

- Groundwater monitoring activities were conducted at the Site and adjacent off-Site areas in July - September 2024. Groundwater samples were analyzed for site-specific chemicals of concern (COCs) consisting of site-specific volatile organic compounds (VOCs), semi-volatile organic compounds (SVOCs), and arsenic.
- Groundwater flow direction and gradients for the A-Transmissive Zone (A-TZ), B-Cohesive Zone/B-Transmissive Zone (B-CZ/B-TZ), C-Transmissive Zone (C-TZ), and D-Transmissive Zone (D-TZ) groundwater-bearing units (GWBU) in July - September 2024 were generally similar to previous sampling events.
- The Texas Risk Reduction Program (TRRP) protective concentration level exceedance (PCLE) zones for site-specific COCs related to creosote in each GWBU are summarized below:
    - A-TZ:
        - The cumulative PCLE Zone in the A-TZ GWBU is within the Site boundary except to the north (along Liberty Road) where it extends onto the City of Houston ROW.

        - Site-specific COC concentrations detected in samples from the off-site A-TZ GWBU wells during the 2nd Semi-Annual 2024 sampling event were below the conservative EPA VISL-calculated screening levels. The A-TZ groundwater data indicates the off-site VI pathway from groundwater is incomplete.
    - B-CZ/B-TZ:
        - The cumulative PCLE Zone based on land use (i.e., C/I for on-Site wells and Residential for off-Site wells) in the B-CZ/B-TZ GWBU (i.e., Class 3 and 2 groundwater, respectively) for the 2nd Semi-Annual 2024 event encompasses the northern portion of the Site, and extends off-site to the north of the Site (referred to as the "Main" PCLE Zone). The PCLE Zone for the smaller area on the west side of the Site is within the Site property boundary (referred to as the "West" PCLE Zone).
    - C-TZ:
        - The cumulative PCLE Zone in the C-TZ is in the northeast portion of the Site and off-site to the northeast onto the City of Houston ROW.
    - D-TZ:
        - No site-specific VOCs or SVOCs were detected at concentrations above cPCLs in samples collected from D-TZ wells during the 1st Semi-Annual 2024 sampling event.

- Arsenic was detected above cPCL (0.01 mg/L) in 27 of the 118 groundwater samples analyzed for arsenic from the 2nd Semi-Annual 2024 sampling event (15 samples in the A-TZ, 11 samples in the B-TZ, and 1 sample in the C-TZ). As detailed in the First Semi-Annual 2022 Site-Wide Groundwater Monitoring Report (Golder, 2022), elevated arsenic concentrations are likely a secondary result of changing geochemical conditions along the edge(s) of a hydrocarbon plume for a majority of the wells as supported by:
    - The on-site presence of creosote-related COCs in the A-TZ,
    - Observed reducing conditions within the A-TZ on- and off-site, and
    - Positive relationship observed between arsenic and iron concentrations.

  Arsenic concentrations in samples collected from MW-91A represent background concentrations in this area of the Site and do not require further delineation as supported by:
    - The distance between the edge of the creosote-related COC PCLE zone in the A-TZ and MW-91A, and
    - Arsenic concentrations in samples collected from wells in between monitoring well MW-91A and the on-site hydrocarbon plume, such as off-site monitoring wells MW-84A, MW-28A, and MW-36A, where groundwater data are consistently below the cPCL for arsenic.

- Trend Analysis: Trend analyses of the primary COC concentrations in groundwater samples from monitoring wells in each GWBU was conducted:
    - Of the 119 wells evaluated, groundwater data from 98 wells show a "decreasing," "probably decreasing," "stable" trend, or "no trend," indicating that primary COC concentrations at a majority of wells are not increasing.
    - Groundwater data from 18 monitoring wells showed a "probably increasing" or "increasing" trend; however, the concentrations in those wells were either low-level detections near the sample detection limit (SDL) or J-flagged results below their respective residential assessment levels (RALs).

  - Groundwater samples from 5 wells showed a “probably increasing” or “increasing” trend in primary COC concentrations where concentrations were not considered low-level detections (near the SDL) or J-flagged (as estimated). Of these 5 wells, two (MW-49B and MW-45C) are DNAPL recovery wells where DNAPL has been detected in the wells.

- Groundwater Plume Analysis: WSP performed a plume analytics evaluation (a Ricker Method® Plume Stability Analysis and Spatial Change Indicator™ Analysis (US Pat. No. 10,400,583)) using groundwater elevation data collected from 1984 to 2024 for the A-TZ, B-CZ/B-TZ, and C-TZ groundwater bearing units. The plume analysis is summarized below:
  - *A-TZ:* All plume trends in the A-TZ were identified as decreasing or not statistically significant (“No Trend”) for the primary COCs.
  - *B-CZ/B-TZ:* All plume trends in the B-CZ/B-TZ were identified as stable or decreasing.
  - *C-TZ:* Average benzene concentration trend was identified as statistically increasing for benzene in the C-TZ; all other trends for the primary COCs in the C-TZ were either decreasing or not statistically significant. The increasing benzene trend in concentration within the C-TZ zone is due to the decreasing area of the plume.

Property owners where the groundwater PCLE Zone extends off-site onto property not owned by UPRR will be notified of the availability of information related to the groundwater monitoring at the Site as required under 30 Texas Administrative Code §350.55(b).

If you have any questions or comments, please feel free to contact Mr. Kevin Peterburs of UPRR at 414-267-4164.

Sincerely,

WSP USA INC.

Matthew K. Wickham, P.G.
Vice-President / Team Lead

CC: Kevin Peterburs, UPRR

1 INTRODUCTION

This Groundwater Monitoring Report (GMR) was prepared by WSP USA Inc. (WSP) on behalf of Union Pacific Railroad (UPRR) to summarize the 2nd semi-annual 2024 site-wide groundwater sampling activities conducted in July and September 2024 at the UPRR Houston Wood Preserving Works (HWPW) Facility (the Site) (Figure 1) located at 4910 Liberty Road, Houston, Texas.

Details of the groundwater monitoring activities, groundwater elevation data, and analytical results are provided in the following sections. In addition, information regarding off-site property notifications in accordance with the Texas Commission on Environmental Quality (TCEQ) Texas Risk Reduction Program (TRRP) Rule 350.55(a) is provided.

2 GROUNDWATER MONITORING ACTIVITIES

WSP, on behalf of UPRR, conducted the 2nd semi-annual 2024 groundwater monitoring activities at the Site between July 22 and September 6, 2024. The semi-annual sampling event included 118 groundwater monitoring wells plus 10 additional monitoring wells associated with Closed Surface Impoundment Unit No. 001 (Solid Waste Management Unit (SWMU) 1). The wells were located on-site and off-site and screened within the following groundwater-bearing units (GWBUs) (Figure 1):

- Forty-nine (49) A-Transmissive Zone (A-TZ) monitoring wells;
- Forty-seven (47) B-Transmissive Zone/B-Cohesive Zone (B-TZ/B-CZ) monitoring wells;
- Twenty-eight (28) C-Transmissive Zone (C-TZ) monitoring wells; and
- Four (4) D-Transmissive Zone (D-TZ) monitoring wells.

Monitoring wells MW-27C, MW-49B, MW-59D, MW-65D, and MW-90B were not accessible during the sampling event due to access and obstructions and were not sampled. Additional details on the SWMU 1 semi-annual sampling are provided in the Corrective Action Monitoring Report dated January 16, 2025 (WSP, 2025).

Prior to sampling, the static depth to water and the thickness of non-aqueous phase liquids (NAPL), if present, were measured using an oil-water interface probe. The static depth to groundwater and NAPL in the wells was measured from the designated surveyed measuring point to the nearest one hundredth of one foot (0.01 ft). The wells were then purged at a flow rate of approximately 0.2 liters per minute using a peristaltic pump with dedicated tubing with the pump intake placed near the lower portion of the screened interval, unless dense NAPL (DNAPL) was present, whereupon the tubing was positioned 2 to 3 feet above the groundwater/DNAPL interface. Purging was accomplished in such a way as to minimize disturbance of sediments at the bottom of the well and, therefore, minimize the turbidity of the water samples. During well purging, field parameters that included specific conductance, pH, temperature, dissolved oxygen, oxidation/reduction potential (redox), and turbidity, were monitored with field meters. Field meters were calibrated before sampling each day using the manufacturer's recommended procedures.

After purging, groundwater samples were collected using low-flow sampling techniques described in the EPA guidance document Low-Flow (Minimal Drawdown) Ground Water Sampling Procedures (EPA, 1996). As requested by the TCEQ in a letter dated September 6, 2019 (Additional Comments to UPRR's July 10, 2019 Response to 4th TNOD), wells with detectable DNAPL were also sampled during the this sampling event.

Since dedicated tubing was used in each well, no equipment rinsate samples were collected. Sampling information (i.e., sample time, bottle sets, sampler name, use of filter, etc.) was recorded on the groundwater sampling field records. Groundwater sampling field records from 2nd semi-annual 2024 sampling event are provided in Attachment A.

Groundwater samples collected from the Site were analyzed for the site-specific chemicals of concern (COCs) identified in the RCRA Facility Investigation (RFI) Work Plan (IC, 1994) and as detailed in the RCRA Permit Application, Compliance Plan (Section XI), Revision No. 5 (Golder, 2020). Site-specific COCs are also listed in the following table:

VOCs	SVOCs	Metals
1,2-Dichloroethane	1,2-Diphenylhydrazine	Arsenic
Benzene	2,4-Dimethylphenol	
Chlorobenzene	2,4-Dinitrotoluene	
Ethylbenzene	2,6-Dinitrotoluene	
Methylene Chloride	2-Chloronaphthalene	
Toluene	2-Methyl-4,6-dinitrophenol	
Xylenes (total)	2-Methylnaphthalene	
Vinyl Chloride (select wells)	4-Nitrophenol	
	Acenaphthene	
	Acenaphthylene	
	Anthracene	
	Benzo(a)anthracene	
	Benzo(a)pyrene	
	bis(2-chloroethoxy)methane	
	bis(2-ethylhexyl)phthalate	
	Chrysene	
	Dibenzofuran	
	Di-n-butyl Phthalate	
	Fluoranthene	
	Fluorene	
	Naphthalene	
	Nitrobenzene	
	n-Nitrosodiphenylamine	
	Pentachlorophenol	
	Phenanthrene	
	Phenol	
	Pyrene	

Site-specific volatile organic compounds (VOCs) were analyzed by EPA Method 8260C, site-specific semi-volatile organic compounds (SVOCs) by EPA Method 8270D, and arsenic by EPA Method 6020A. Groundwater samples were placed on ice in coolers and hand delivered to ALS Laboratory Group in Houston, Texas for analysis.

Samples collected from the Site were analyzed in accordance with the guidelines of EPA SW-846, Test Methods for Evaluating Solid Waste-Physical/Chemical Methods. The procedures for laboratory analysis, with any modifications, are further documented in the laboratory standard operating procedures, which are maintained at the laboratory, and are listed in the laboratory's quality assurance plan. Analytical data from the groundwater samples collected during the groundwater monitoring event were reviewed for adherence to established quality assurance/quality control (QA/QC) criteria. Data Usability Summaries (DUSs), prepared in accordance with TCEQ guidance publication RG-366/TRRP-13 (TCEQ, 2010) summarize the quality of the laboratory analytical data and present any deviations from the established QA/QC criteria. Copies of the analytical data reports and the DUSs are provided in Attachment B.

Based on the QA/QC review, the groundwater data evaluated in this report are considered usable for the purpose of evaluating COCs in Site environmental media, to assess the affected property based on the COCs, and establish TRRP protective concentration level (PCL) exceedance (PCLE) zones.

3 GROUNDWATER ELEVATION DATA AND DNAPL MEASUREMENTS

Groundwater elevations for the monitoring wells gauged during the 2nd semi-annual 2024 sampling event are summarized on Table 1. Potentiometric surface maps for each of the four GWBUs, A-TZ, B-TZ/B-CZ, C-TZ, and D-TZ, are presented on Figures 2 through 5 for the 2nd semi-annual 2024 event. Groundwater flow conditions for each GWBU are described in the following sections.

3.1 A-TZ WELLS

The highest groundwater elevation in the A-TZ was measured near SWMU No.1 at 45.81 feet relative to the City of Houston Vertical Datum (HVD) (MW-09), with the lowest elevation on the east side of the Site at 33.76 feet HVD (MW-69A) (Figure 2). The groundwater flow direction in the A-TZ varies across the Site (Figure 2). As discussed in the APAR Addendum (PBW, 2010), a 60-inch sanitary sewer line runs north to south just west of the Lockwood Bridge and appears to intersect the A-TZ, influencing groundwater flow in this area. Groundwater flow in the A-TZ flows to the east on the west side of the sanitary sewer line and flows to the west on the east side of the wastewater line (Figure 2).

No DNAPL was detected in the A-TZ wells during the 2nd semi-annual 2024 monitoring event.

3.2 B-TZ/B-CZ WELLS

As documented in the Response Action Plan (RAP) (Attachment 1A - APAR Addendum, PBW, 2014), a lateral stratigraphic change in the hydrogeology of the B-TZ has been identified at the Site. The more transmissive B-TZ pinches out from west to east into the B-CZ clay unit, where groundwater is encountered in very thin carbonate seams (typically less than 0.1 feet thick) within the clay unit at relatively the same elevation as the B-TZ. The B-CZ, where these thin carbonate seams are encountered, was classified as a Class 3 groundwater resource, and this designation was approved by the TCEQ in the 3rd TNOD letter dated April 10, 2017. The estimated boundary of the transition from Class 2 (B-TZ) to Class 3 (B-CZ) groundwater is shown on Figure 3.

B-TZ

Groundwater elevations in the B-TZ ranged from a high elevation measured southwest of the Site of 46.02 feet HVD at MW-96B, to the lowest elevation of 39.32 feet HVD at MW-89B located off-site to the north of the site (Figure 3). Groundwater in the B-TZ generally flows from the southwest to the northeast across the Site (Figure 3), similar to groundwater flow in the A-TZ. As discussed in the APAR Addendum (PBW, 2010), there appears to be communication between the A-TZ and B-TZ as indicated by the relatively similar groundwater elevations in the two units. Off-site to the north of Liberty Road, the groundwater flow conditions in the B-TZ are variable with groundwater flow generally to the northeast.

B-CZ

The highest measured groundwater elevation in the B-CZ is north of the Site at 44.39 feet HVD at MW-71B, with the lowest elevation of 31.43 feet HVD near the northeastern border of the Site at MW-54B. The groundwater flow conditions within the B-CZ are variable, but overall flow is generally to the northeast.

DNAPL was detected in on-site wells MW-57B and MW-74Bduring the July 2024 sampling event.

3.3 C-TZ WELLS

Groundwater elevations measured in the C-TZ ranged from a high elevation of 30.56 feet HVD at MW-27C which is located off-site to the northeast (Figure 4). The lowest elevation measured in the C-TZ during the 2nd semi-annual 2024 sampling event was 26.32 feet HVD at MW-21C on the west side of the Site. Groundwater flow in the C-TZ is generally to the southwest across the Site (Figure 4), which is consistent with historical groundwater flow patterns.

No DNAPL was detected in the C-TZ monitoring wells.

3.4 D-TZ WELLS

Only two D-TZ wells, MW-36D and MW-66D, were able to be measured during the 2nd semi-annual 2024 sampling event. The other two D-TZ wells, MW-59D and MW-65D, were obstructed during the sampling event. Groundwater flow in the D-TZ is generally from the southeast to northwest at the Site (Figure 5).

No DNAPL was detected in the D-TZ monitoring wells.

4 GROUNDWATER ANALYTICAL RESULTS

Groundwater analytical results from the 2nd semi-annual 2024 sampling event are summarized along with the historical groundwater monitoring data from July 2008 through July/September 2024 in the following tables:

- Table 2 – Analytical Results Summary (2008 – 2024) – Class 2 Groundwater
- Table 3 – Analytical Results Summary (2008 – 2024) – Class 3 Groundwater
- Table 4 - Analytical Results Summary – A-TZ Wells – VISL Comparison

Historical groundwater data collected prior to 2008 are summarized in the Revised Affected Property Assessment Report (APAR) dated June 10, 2004 (ERM, 2004) and APAR Addendum dated July 13, 2009 (PBW, 2009).

Groundwater analytical data in Table 2 associated with the 2nd semi-annual 2024 sampling event were compared to the TCEQ TRRP Tier 1 residential groundwater PCLs or Residential Assessment Levels (RALs) and commercial/industrial (C/I) PCLs (the lesser value of the $^{GW}GW_{Ing}$ and $^{Air}GW_{Inh\text{-}V}$ PCLs), dated May 2023 based on a 30-acre source area. Data in Table 3 (wells completed in B-CZ) were compared to RALs and C/I PCLs associated with a Class 3 groundwater resource and 30-acre source area (lesser value of the Tier 1 $^{GW}GW_{Class\ 3}$ and $^{Air}GW_{Inh\text{-}V}$ PCLs). Critical PCLs (cPCLs) used to define PCLE Zones were established assuming residential or C/I land use depending on the location of the monitoring well. On-site well data was compared to C/I PCLs while data from off-site wells was compared to RALs. PCLE Zones were established based on the COC concentrations reported during the 2nd semi-annual 2024 sampling event.

4.1 SITE-SPECIFIC COCS

Based on the comparison of site-specific COCs to the applicable TRRP groundwater cPCLs, the following eight site-specific COCs (plus arsenic) were detected at concentrations that exceeded their respective cPCL during the 2nd semi-annual 2024 sampling event (GWBU where concentrations >cPCLs were detected noted):

Volatile Organic Compounds (VOCs)[1]

- Benzene (A-TZ, B-CZ/B-TZ, C-TZ)

Semi-Volatile Organic Compounds (SVOCs)[2]

- 2,4-Dimethylphenol (A-TZ)
- 2,6-Dinitotoluene (C-TZ)
- 2-Methylnaphthalene (A-TZ, B-TZ, & C-TZ)
- Benzo(a)anthracene[3] (A-TZ, B-TZ, C-TZ)
- Benzo(a)pyrene (A-TZ, B-TZ, & C-TZ)
- Dibenzofuran (A-TZ, B-TZ, C-TZ)
- Naphthalene (A-TZ, B-TZ, & C-TZ)

Notes:

[1] VOC methylene chloride was not detected but the sample detection limit (SDL) was greater than the cPCL for a few samples.

[2] SVOCs 1,2-diphenylhradzine, 2,4-dinitrotoluene, 2,6-dinitotoluene, 4,6-Dinitro-2-methylphenol (C-TZ), benzo(a)anthracene (C-TZ), benzo(a)pyrene, bis(2-Chloroethoxy)methane, bis(2-Ethylhexyl)phthalate (DEHP) (C-TZ), and pentachlorophenol were not detected but the SDLs were greater than the cPCL for a few samples.

[3] COC only detected above cPCLs in wells where DNAPL was present or has been present in the past.

The spatial distribution of COC concentrations in groundwater samples collected from each GWBU during the 2nd semi-annual 2024 event and the cumulative/overall combined PCLE zones for VOC and SVOC COCs and separate arsenic PCLE zones are presented on the following figures:

- Figure 6 for A-TZ,
- Figure 7 for B-CZ/B-TZ,
- Figure 8 for C-TZ, and
- Figure 9 for D-TZ.

Cumulative PCLE zones for each GWBU for the 2nd semi-annual 2024 event are presented on Figure 10 for site-specific VOC and SVOC COCs and Figure 11 for arsenic.

In addition to the figures listed above, individual VOC and SVOC COC concentration isopleth maps (Figures 12 through 26) for the most commonly detected groundwater COCs (primary VOC: benzene, and primary SVOCs: 2,4-dimethylphenol, 2-methylnaphthalene, dibenzofuran, and naphthalene) at the Site using the 2nd semi-annual 2024 data were prepared for the A-TZ, B-CZ/B-TZ, and C-TZ units using the Kriging gridding method with the default linear variogram (complete description of method is provided in Attachment D), as listed below:

GWBU	A-TZ	B-CZ/B-TZ	C-TZ
COC	**Figure No.**		
Benzene	12	17	22
2,4-Dimethylphenol	13	18	23
2-Methylnaphthalene	14	19	24
Dibenzofuran	15	20	25
Naphthalene	16	21	26

As noted above, cumulative groundwater PCLE Zones that include these COCs in each GWBU are presented on Figures 6 through 8.

Arsenic concentration maps showing the arsenic PCLE Zones for the A-TZ, B-CZ/B-TZ, and C-TZ GWBUs and data for the D-TZ unit based on the 2nd semi-annual 2024 data are presented on Figures 27 through 30, respectively.

4.2 A-TZ WELLS

VOCs

Benzene concentrations were detected above the cPCL (0.005 mg/L ($^{GW}GW_{Ing}$ PCL)) in 6 of the 45 groundwater samples (13%) from the A-TZ wells collected during the 2nd semi-annual 2024 groundwater monitoring event. Groundwater samples from A-TZ monitoring wells with benzene concentrations detected above the cPCL were predominantly located on the eastern portion of the Site and in the northern portion of the Englewood Intermodal Yard (Figure 12). Vinyl chloride concentrations were detected above the cPCL (0.002 mg/L ($^{GW}GW_{Ing}$ PCL)) in 1 of the 6 groundwater samples from the A-TZ wells in well MW-18A (Figure 6). Analytical data from the 2nd semi-annual 2024 sampling event indicated that benzene concentrations are below the cPCLs in samples from the A-TZ wells located to the north, east, south, and west of the Site. Site-specific VOC concentrations in samples collected from off-site A-TZ monitoring wells were below cPCLs.

SVOCs

The primary site-specific SVOCs detected in the samples from the A-TZ wells that exceeded cPCLs are listed below (with number of samples that exceeded compared to total number of samples (percentage of samples with exceedance)):

- 2,4-Dimethylphenol (1 out of 45 samples (2%)) (Figure 13), and
- Naphthalene (3 out of 52 samples (6%)) (Figure 16).

Other SVOCs (benzo(a)pyrene and bis(2-choloroethoxy)methane) were also detected above cPCLs in the following A-TZ two monitoring wells:

- Benzo(a)pyrene in MW-49A (1 out of 45 samples (2%)), and
- Bis(2-choloroethoxy)methane in MW-79A (1 out of 45 samples (2%)).

COCs 2,4-dinitrotoluene, 2,6-dinitotoluene, bis(2-chloroethoxy)methane, benzo(a)pyrene, and pentachlorophenol were not detected above the sample detection limits (SDLs). However, for these SVOCs, the SDL was greater than the cPCL in

only one sample collected from MW-17 due to matrix interference or high concentrations of target and/or non-target compounded resulting in sample dilution and elevated reporting limits. Concentrations for the other site-specific SVOCs analyzed were either below cPCLs or below the SDL in samples from the A-TZ wells collected during the 2nd semi-annual 2024 sampling event.

Site-specific SVOCs were detected above applicable cPCLs in samples collected from A-TZ wells located generally on the eastern portion of the Site and in the northern portion of the Englewood Intermodal Yard. Analytical data from the 2nd semi-annual 2024 sampling event indicated that the site-specific SVOCs concentrations were below their respective cPCLs in samples from the A-TZ wells located to the north, east, south, and west of the Site, similar to the distribution of benzene concentrations in the A-TZ. None of the site-specific SVOC concentrations detected in samples from the off-site A-TZ wells exceeded their respective RALs.

The PCLE Zones for the individual SVOCs in the A-TZ are within the Site boundary based on the interpretation of the groundwater concentration data on-site and off-site as shown on the isopleth maps (Figures 13 through 16). In these areas, samples from on-site monitoring wells indicate PCL exceedances, but samples from the off-site wells closest to those locations do not indicate PCL exceedances.

The cumulative PCLE Zone for site-specific VOC and SVOC COCs in the A-TZ compared to previous events continues to indicate the plume stable. Additional analysis of the plume stability is provided in Section 4.6.2.

EPA Vapor Intrusion Screening Level Evaluation

Groundwater analytical data from the 2nd semi-annual 2024 event for the off-site monitoring wells completed in the A-TZ to the north, west, and east of the Site were also compared to values developed using the U.S. Environmental Protection Agency's (EPA's) vapor intrusion screening level (VISL) calculator (EPA, 2015, EPA, 2019). The VISL calculator was used to calculate conservative, non-site specific, risk-based potential vapor intrusion (VI) screening values for the identified COCs in the A-TZ GWBU. The VISL tool calculates the COC concentration in groundwater, based on certain default conditions, at which the COC is not expected to pose an unacceptable VI risk.

EPA VISL Calculator

The VISL calculator (EPA, 2019) provides screening concentrations based on several basic inputs, including a residential or commercial exposure scenario, target hazard quotient, target carcinogenic risk, and groundwater temperature. For this evaluation, the selected inputs were – residential scenario, hazard quotient of 0.1, carcinogenic risk of 10^{-5} (consistent with the TRRP criteria), and groundwater temperature of 25°C. Also, EPA's VISL calculator uses a conservative default attenuation factor of 0.001 for the attenuation of vapors between the groundwater source zone and the overlying receptor. This attenuation factor is not adjusted for the more rapid attenuation of petroleum hydrocarbon vapors and is therefore likely overly conservative for these compounds. Based on these inputs, the groundwater screening concentrations were calculated. The calculated concentrations were compared to the July 2024 groundwater sample COC concentrations for the Site-specific COCs (Table 4).

As indicated in Table 4, COC concentrations reported in off-site A-TZ GWBU wells were below the conservative EPA VISL-calculated groundwater screening concentrations for the 2nd semi-annual 2024 sampling event.

4.3 B-CZ/B-TZ WELLS

VOCs

Benzene concentrations were detected above the cPCL of 0.005 mg/L ($^{GW}GW_{Ing}$ PCL) in 7 of the 29 (24%) samples collected from the B-TZ wells and above the 0.5 mg/L ($^{GW}GW_{Class\ 3}$ PCL) in 4 of the 15 (27%) samples collected from the B-CZ wells. Two separate PCLE Zones (Main and West) are evident based on the 2nd semi-annual 2024 groundwater data from the B-CZ/B-TZ monitoring wells (as shown on Figure 17). These two PCLE Zones are described below:

- Main PCLE Zone: The primary benzene PCLE zone in the B-CZ/B-TZ GWBU (groundwater classification Class 3 and Class 2, respectively) includes a small area in the north portion of the Site and extends approximately 600 feet north of the UPRR property boundary. This PCLE zone appears to be delineated based on data for surrounding monitoring wells (MW-63B, MW-71B, MW-82B, MW-84B, MW-92B and MW-93B).
- West PCLE Zone: A small benzene PCLE zone is located on the west side of the Site defined by results from a solitary well (MW-41B, which is a DNAPL recovery well. Benzene concentrations at MW-40B were less than the SDL; however, the SDL was greater than the cPCL. Historically, benzene concentrations have been greater than the cPCL at MW-40B. Therefore, monitoring well MW-40B is included within the benzene PCLE zone. This PCLE zone appears to be confined within the UPRR property boundary based on data for surrounding monitoring wells (MW-12B, MW-39B, MW-42B, MW-62B, P-11, and TW-41B).

Other site-specific VOC concentrations were detected in the samples collected from the B-CZ/B-TZ monitoring wells; however, the detected concentrations were below their respective cPCLs (Tables 2 and 3).

SVOCS

The primary site-specific SVOCs detected in the samples from the B-CZ/B-TZ wells that exceeded cPCLs are listed below:

- 2,4-Dimethylphenol (1 out of 44 samples (2%)) (Figure 18)
- 2-Methylnaphthalene (2 out of 44 samples (5%)) (Figure 19),
- Dibenzofuran (2 out of 49 samples (2%)) (Figure 20) and
- Naphthalene (4 out of 49 samples (10%)) (Figure 21).

These primary site-specific SVOCs were detected above their respective cPCLs in samples located generally within the B-CZ/B-TZ Main and West PCLE Zones described above.

In addition to the primary SVOCs discussed above, the following other site-related COCs were detected at concentrations that exceeded their respective cPCLs:

- 1,2-Diphenylhydrazine exceeded the cPCL in MW-74B (DNAPL recovery well).
- Acenaphthene exceeded the cPCL in MW-75B (DNAPL recovery well).
- Benzo(a)pyrene concentrations were detected in samples collected from DNAPL recovery wells MW-12B, MW-68B, MW-74B, and MW-75B at concentrations greater than their SDLs and cPCLs.
- Benzo(a)anthracene exceeded the cPCL MW-74B and MW-75B (DNAPL recovery wells).
- Fluorene exceeded the cPCL in MW-75B (DNAPL recovery well).
- Fluoranthene exceeded the cPCL in MW-75B (DNAPL recovery well).
- Phenanthrene exceeded the cPCL in MW-75B (DNAPL recovery well).
- Pyrene exceeded the cPCL in MW-75B (DNAPL recovery well).

COCs 1,2-dichloroethane, 2,4-dinitrotoluene, 2,6-dinitotoluene, bis(2-chloroethoxy)methane, benzo(a)pyrene, methylene chloride, pentachlorophenol, and vinyl chloride were not detected above the sample detection limits (SDLs). However, for these SVOCs, the SDL was greater than the cPCL in samples collected from MW-35B, MW-38B, MW-40B, MW-41B, MW-70B, MW-74B, MW-75B, or MW-83B due to matrix interference or high concentrations of target and/or non-target compounded resulting in sample dilution and elevated reporting limits. Concentrations for the other site-specific SVOCs analyzed were either below cPCLs or below the SDL in samples from the B-TZ/B-CZ wells collected during the 2nd semi-annual 2024 sampling event.

The PCLE zones for the primary and additional site-specific SVOCs are generally within the confines of the benzene PCLE zone described above except for the West PCLE Zone that is defined by benzo(a)pyrene concentrations in MW-12B and benzene, benzo(a)pyrene, and naphthalene concentrations in MW-40B and MW-41B.

The cumulative PCLE Zones for site-specific COCs detected in the B-CZ/B-TZ monitoring wells continue to indicate a stable and/or decreasing plume compared to previous sampling events. Additional analysis of the plume stability is provided in Section 4.6.2.

4.4 C-TZ WELLS

VOCs

Benzene concentrations were detected above the cPCL (0.005 mg/L) in 2 of the 27 (7%) groundwater samples collected from C-TZ wells during the 2nd semi-annual 2024 groundwater monitoring event. Benzene concentrations were detected above the cPCL in groundwater samples from two on-site wells located in the northeast portion of the Site (MW-18C and MW-23C) (Figure 22). None of the off-site C-TZ wells had benzene concentrations detected above the cPCL. Methylene chloride in MW-21C and MW-25C, chlorobenzene in MW-21C and 1,2-dichloroethane in MW-21C were not detected above SDLs; however, the SDLs in those samples were elevated above their respective cPCLs. Since these COCs have not historically been detected above cPCLs at MW-21C or MW-25C, they are not included within the PCLE zone for the C-TZ.

SVOCs

Site-specific SVOCs were detected above applicable cPCLs in groundwater samples collected from C-TZ wells. The primary SVOCs detected in samples from the C-TZ wells above cPCLs include:

- 2-Methylnaphthalene (1 out of 27 samples (4%)) (Figure 24), and
- Naphthalene (3 out of 27 samples (11%)) (Figure 26).

Concentrations of 2,4-dimethylphenol and dibenzofuran in July 2024 did not exceed their respective cPCLs (Figures 23 and 25, respectively). Site-specific SVOC benzo(a)pyrene was detected above the cPCL (0.0002 mg/L) in samples collected from on-site well MW-18C and off-site well MW-46C (Figure 8).

PCLE Zones for these COCs are located on the northeastern portion of the Site and offsite to the northeast along Liberty Road and near the Lockwood Bridge. As a result, the cumulative groundwater PCLE Zone for the primary SVOCs is predominately within the Site boundary except to the northeast where it extends onto the City of Houston right-of-way (ROW) (MW-46C and historical DNAPL wells around the Lockwood Drive). Except for the benzo(a)pyrene concentration at MW-46C, the SVOC PCLE zones are within the benzene PCLE zone discussed above.

SDLs for 1,2-diphenylhydrazine, 2,4-dinitrotoluene, 2,6-dinitotoluene, 4,6-dinitro-2-methylphenol, benzo(a)anthracene, benzo(a)pyrene, bis(2-chloroethoxy)methane, bis(2-ethylhexyl)phthalate (DEHP), and pentachlorophenol in samples from MW-17C and MW-45C were greater than their respective cPCLs; however, no concentrations were detected above the elevated SDLs.

DNAPL has been historically detected in samples from wells MW-45C and MW-46C. Trace amounts of DNAPL were detected in MW-23C and MW-45C during the bi-monthly recovery events[1] in the second half of 2024.

The cumulative PCLE Zones for VOCs and SVOCs in the C-TZ continue to indicate a decreasing plume compared to previous events. Additional analysis of the plume stability is provided in Section 4.6.2.

4.5 D -TZ WELLS

VOCs

[1] DNAPL recovery is performed bi-monthly (twice monthly) and reported quarterly (see WSP, 2024b for the latest report).

No site-specific VOCs were detected above cPCLs in samples collected from D-TZ wells during the 2nd semi-annual 2024 monitoring event.

SVOCs

No site-specific SVOCs were detected above cPCLs in samples collected from D-TZ wells during the 2nd semi-annual 2024 monitoring event.

4.6 TREND ANALYSIS

WSP evaluated the trends of primary COC concentrations using the Mann-Kendall trend test for individual monitoring wells (Attachment C). Details of the trend analyses are provided below.

4.6.1 INDIVIDUAL WELLS

WSP conducted a trend analysis of the primary COC concentrations (benzene, 2,4-dimethyphenol, 2-methylnaphthalene, dibenzofuran, and naphthalene) for each monitoring well using the Mann-Kendall trend test. The trend analysis included data from groundwater samples from monitoring wells in each GWBU from 2009 (or from date of installation) to 2024 for wells with at least four sampling events, including samples collected from wells containing detectable DNAPL. The Mann-Kendall test is a nonparametric method (i.e., it does not require a distributional assumption of the data) to test for an increasing or decreasing linear trend over time. The Mann-Kendall test also does not require special treatment for non-detects, other than non-detect concentrations should be set to a common value lower than any of the detected concentrations (EPA, 2009). The Mann-Kendall test was performed for each well with at least one detection of a primary COC.

The Mann-Kendall trend tests were performed using the statistical software R© (The R© Foundation, 2021) and the EnvStats package (Package 'EnvStats', 2021). Mann-Kendall test results with a p-value less than an error rate of α=0.05 (i.e., 95% level of confidence) indicate a statistically significant increasing or decreasing trend. Results with a p-value greater than 0.05 but less than 0.1 indicate a "probably" increasing or "probably" decreasing trend. Mann-Kendall test results with a p-value greater than 0.1 indicate either a "stable" trend or "no trend". A "stable" trend occurs when data for a COC in a well has a coefficient of variation less than 1, appears to follow a decreasing trend (when the Mann-Kendall test statistic is negative), and has a p-value from the Mann-Kendall test greater than 0.1. In all other cases when the p-value from the Mann-Kendall test is greater than 0.1, the COC in the well is considered to have "no trend".

The results of the Mann-Kendall analysis for each well and COC evaluated are provided on Table C-1 in Attachment C. The trend results summarized on Table C-1 use the following abbreviations for the calculated trends: decreasing ("D"), probably decreasing ("PD"), stable ("S"), probably increasing ("PI"), increasing ("I"), and no trend ("NT").

The Mann-Kendall test results generally indicated that primary COC concentrations are either stable, decreasing, probably decreasing, or exhibit no trend in samples from 98 of the 119 site-wide monitoring wells at the Site. Any COC in a well in which all concentrations are below detection limits for all sampling events is assigned "ND" on Table C-1 (Attachment C).

The Mann-Kendall test results identified COCs as probably increasing ("PI") or increasing ("I") in samples from 14 monitoring wells, where recent analytical results were reported as either not detected, just above the SDL, or J-flagged as estimated (value was between the SDL and quantitation limit). In each case, the recent COC detections were orders of magnitude below the applicable cPCL for the COC. This included the following **18 wells** and COCs:

- A-TZ wells: MW-03 (naphthalene), MW-13 (2,4-dimethylphenol), MW-64A (naphthalene), and MW-95A (naphthalene);
- B-CZ well: MW-33BR (2,4-dimethylphenol), MW-61B (2-methylnaphthalene, dibenzofuran, & naphthalene), MW-63B (naphthalene);

- B-TZ wells:MW-81B (2,4-dimethylphenol & dibenzofuran), MW-89B (dibenzofuran), MW-96B (2-methylnaphthalene, dibenzofuran, & naphthalene), and P-11 (2-methylnaphthalene); and
- C-TZ wells: MW-19C (dibenzofuran), MW-23C (2,4-dimethylphenol), MW-34CR (dibenzofuran), MW-45C (2,4-dimethylphenol), MW-53C (2,4-dimethylphenol & dibenzofuran), MW-86C (dibenzofuran) and MW-87C (2,4-dimethylphenol).

Mann-Kendall test results indicate an increasing/probably increasing trend in the samples from the following monitoring wells that had concentrations exceeding the cPCL or within the same order of magnitude as the cPCL:

A-TZ:

None of the A-TZ wells indicate an increasing/probably increasing trend in the samples from the following monitoring wells that had concentrations exceeding the cPCL or within the same order of magnitude as the cPCL.

B-CZ/B-TZ:

- Off-site well MW-38B: The evaluation indicates a **probably increasing** trend in dibenzofuran and naphthalene concentrations in samples collected from off-site well MW-38B. The concentrations observed in MW-38B from the 2nd semi-annual 2024 sampling event are all below the cPCLs (Class 2 groundwater) and below historical maximum detections for the primary site-specific COCs, but are within an order of magnitude of the cPCLs.
- On-site well MW-49B: Monitoring well MW-49B has not been accessible the last two semi-annual groundwater monitoring events. The following evaluation is based on groundwater data collected through July 2023. The evaluation indicates an **increasing** trend in benzene, 2,4-dimethylphenol, 2-methylnaphthalene, dibenzofuran, and naphthalene concentrations in samples collected from on-site well MW-49B. MW-49B is part of the current DNAPL recovery well network and DNAPL has been detected during bi-monthly recovery events. These COC concentrations detected in MW-49B are less than the historical maximums previously detected at this monitoring/recovery well.
- On-site well TW-41B: Results indicate an **increasing** trend in benzene, 2-methylnaphthalene, dibenzofuran, and naphthalene in on-site well TW-41B. Monitoring well TW-41B is located between DNAPL recovery wells MW-12B (approximately 220 feet north) and MW-41B (approximately 165 feet south). These COC concentrations detected in TW-41B are less than the historical maximums previously detected at this monitoring well, and none of the concentrations exceed their respective cPCL.
- Off-site well MW-63B: The evaluation indicates an **increasing** trend in benzene concentrations in samples collected from off-site well MW-63B. The concentrations observed in MW-63B from the 2nd semi-annual 2024 sampling event are all below the cPCL (Class 3 groundwater) and below historical maximum detections for the primary site-specific COCs, but are within an order of magnitude of the cPCL.

C-TZ:

- Off-site well MW-45C: Results indicate a **probably increasing** trend in dibenzofuran concentrations and an **increasing** trend in 2-methylnaphthalene concentrations in samples from off-site well MW-45C. MW-45C is part of the current DNAPL recovery well network. DNAPL was not present in MW-45C during the bi-monthly recovery events in the second half of 2024. The concentrations observed in MW-45C from the 2nd semi-annual 2024 sampling event are all below historical maximum detections for the primary site-specific COCs. The trend results are affected by anomalously high results observed during the 2nd 2022 semi-annual monitoring event as detailed in the previous semi-annual monitoring report (WSP, 2023c).

Of the 119 wells evaluated, primary COC data associated with 5 wells listed above, showed a probably increasing or increasing trend in concentrations (excludes the 18 wells discussed above with low-level or J-flagged results). Of these five wells, two wells (MW-49B and MW-45C) are DNAPL recovery wells where product has been detected in the wells.

4.6.2 PLUME ANALYTICS

WSP performed a plume analytics evaluation using groundwater analytical data and groundwater elevation data collected from 1984 to 2024 for the A-TZ, B-CZ/B-TZ, and C-TZ groundwater bearing units. This evaluation included a Ricker

Method® Plume Stability Analysis and Spatial Change Indicator™ Analysis (US Pat. No. 10,400,583) for each of the primary COCs (benzene, 2,4-dimethyphenol, 2-methylnaphthalene, dibenzofuran, and naphthalene) in each groundwater bearing unit. The complete analyses including details of the methodologies are provided in Attachment D. A summary of the results is provided below.

Ricker Method® Plume Stability Trend Results			
Constituent	**Area**	**Average Concentration**	**Mass Indicator**
A-TZ (2014 – 2024)			
2,4-Dimethylphenol	Decreasing Trend	Decreasing Trend	Decreasing Trend
2-Methylnaphthalene	Decreasing Trend	Decreasing Trend	Decreasing Trend
Benzene	No Trend	Decreasing Trend	Decreasing Trend
Dibenzofuran	Decreasing Trend	Decreasing Trend	Decreasing Trend
Naphthalene	Decreasing Trend	Decreasing Trend	Decreasing Trend
B-CZ/B-TZ (2012 – 2024)			
2,4-Dimethylphenol	Decreasing Trend	Decreasing Trend	Decreasing Trend
2-Methylnaphthalene	Decreasing Trend	Decreasing Trend*	Decreasing Trend*
Benzene	Stable	Decreasing Trend	Decreasing Trend
Dibenzofuran	Stable	Stable	Stable
Naphthalene	Decreasing Trend	Decreasing Trend	Decreasing Trend
C-TZ (2004 – 2024)			
2,4-Dimethylphenol	No Trend	No Trend	No Trend
2-Methylnaphthalene	Decreasing Trend	Decreasing Trend*	Decreasing Trend
Benzene	Decreasing Trend	Increasing Trend	Decreasing Trend
Dibenzofuran	Decreasing Trend	Decreasing Trend	Decreasing Trend
Naphthalene	Decreasing Trend	Decreasing Trend*	Decreasing Trend

*Based on Mann-Kendall
**Based on linear regression

A-TZ
As presented above, all trends in the A-TZ were identified as decreasing or not statistically significant (“No Trend”) for the primary COCs.

B-CZ/B-TZ
All trends in the B-CZ/B-TZ were identified as stable or decreasing.

Please note that during development of the input data set, some apparently anomalous results were observed for wells in the B-CZ/B-TZ and C-TZ groundwater bearing units. For example, naphthalene was detected at a value of 1,200 mg/L in MW-49B in January 2020. MW-49B has been sampled 22 times since 2009 and excluding the anomalous January 2020 result, the average concentration of the remaining 21 events is 3.8 mg/L and the maximum concentration is 15 mg/L. Since the solubility limit of naphthalene is approximately 31.6 mg/L, it is highly improbable that the January 2020 result of 1,200 mg/L is representative of dissolved naphthalene in groundwater. Anomalous results were assigned a replacement value using an algorithm based on solubility limits. Additional details are provided in Attachment D.

C-TZ

Average benzene concentration trend was identified as statistically increasing for benzene in the C-TZ; all other trends for the primary COCs in the C-TZ were either decreasing or not statistically significant.

The calculated increasing trend in benzene concentrations within the C-TZ zone is due to the decreasing area of the plume. When a plume reduces in area, the lowest concentration wells will be the first to reach non-detect and be removed from the calculation, thus the remaining wells, which may not have decreased as much, cause the average concentration to be higher. Therefore, it is important to consider all plume metrics together when assessing plume stability.

4.7 ARSENIC

Arsenic concentrations from the 2nd semi-annual 2024 sampling event were detected above the cPCL (0.010 mg/L) in 27 of the 118 (23%) groundwater samples analyzed for arsenic (15 samples in the A-TZ, 11 samples in the B-TZ, and 1 samples in the C-TZ). As detailed in the First Semi-Annual 2022 Site-Wide Groundwater Monitoring Report (Golder, 2022), elevated arsenic concentrations are likely associated with geochemical conditions developed along the hydrocarbon plume for most of the wells as supported by:

- The on-site presence of creosote-related COCs in the A-TZ,
- Observed reducing conditions within the A-TZ on- and off-site, and
- Positive relationship observed between arsenic and iron concentrations.

However, arsenic concentrations at off-site monitoring well MW-91A completed in the A-TZ are not related to creosote-related COCs. Arsenic concentrations in samples collected from this well represent background concentrations in this area of the Site (Golder, 2022) and do not require further delineation as supported by:

- The distance between the edge of the creosote-related COC PCLE zone in the A-TZ and MW-91A (approx. 750 feet), and
- Arsenic concentrations in samples collected from monitoring wells located between monitoring well MW-91A and the on-site hydrocarbon plume, such as off-site monitoring wells MW-84A, MW-28A, and MW-36A, where arsenic groundwater data are consistently below the cPCL.

The arsenic concentration in samples collected from MW-91A have ranged from 0.00989 mg/L to 0.0232 mg/L since installation.

5 CONCLUSIONS

The following conclusions were made for each GWBU based on the groundwater sampling analytical results from the 2nd semi-annual 2024 site-wide groundwater monitoring event conducted in July and September 2024:

- **A-TZ:**
  - The cumulative VOC/SVOC PCLE Zone in the A-TZ GWBU is within the Site boundary except to the north (along Liberty Road) where it extends onto the City of Houston ROW.
  - Site-specific VOC/SVOC concentrations detected in samples from the off-site A-TZ GWBU wells were below the conservative EPA VISL-calculated screening levels. This indicates that COC concentrations are not expected to pose an unacceptable VI risk.
  - Trend analyses indicate overall plume stability in the A-TZ.
    - Individual well trend analysis indicates a probably decreasing, decreasing, stable, or no trend for primary COC concentrations in 39 of the 43 A-TZ wells sampled.
    - Four wells completed in the A-TZ indicated probably increasing or increasing concentration trends; all four of these wells had COC concentrations that were orders of magnitude below the appliable cPCL for the COC and were detected just above the SDL or were estimated (J-flagged).
    - The Ricker Method® Plume Stability Analysis and Spatial Change Indicator™ Analysis indicate decreasing trends for the five primary COCs in terms of area (except for benzene that indicated "no trend"), average concentration, and mass indicator.
- **B-CZ/B-TZ:**
  - The cumulative VOC/SVOC PCLE Zone based on residential and C/I land use (i.e., C/I for on-Site wells and Residential for off-Site wells) and both Class 2 and 3 groundwater in the B-CZ/B-TZ GWBU (i.e., Class 3 and 2 groundwater, respectively) includes a small area in the north portion of the Site and extends approximately 600 feet north of the UPRR property boundary (referred to as the "Main" PCLE Zone). A smaller VOC/SVOC PCLE Zone located on the west side of the Site is within the Site property boundary (referred to as the "West" PCLE Zone).
  - Trend analyses indicate overall plume stability in the B-CZ/B-TZ.
    - Individual well trend analysis indicates a probably decreasing, decreasing, stable, or no trend for primary COC concentrations in 34 of the 44 B-CZ/B-TZ wells analyzed. Ten wells completed in the B-CZ/B-TZ indicated probably increasing or increasing concentration trends; however, seven of these wells had COC concentrations that were just above the SDL or estimated (J-flagged) and were below the applicable cPCL for the COC. Four wells had COC concentrations that were on the same order of magnitude as the applicable cPCL but were not detected greater than the cPCL
    - The Ricker Method® Plume Stability Analysis and Spatial Change Indicator™ Analysis indicate decreasing trends for four of the five primary COCs in terms of area (except for benzene that indicated "stable"), average concentration, and mass indicator. Analysis of dibenzofuran concentrations indicated stable conditions in terms of area, average concentration, and mass indicator.
- **C-TZ:**
  - The cumulative VOC/SVOC PCLE Zone in the C-TZ is in the northeast portion of the Site and extends off-site to the northeast onto the City of Houston ROW.
  - Trend analyses indicate overall plume stability in the C-TZ.
    - Individual well trend analysis indicates a probably decreasing, decreasing, stable, or no trend in 21 of the 28 C-TZ wells analyzed.
      - Of the seven wells that exhibit probably increasing or increasing trends in COC concentrations, COC concentrations in each well varied slightly around the SDL (several orders of magnitude below cPCLs), except for 2-methylnaphthalene and dibenzofuran in well MW-45C, which were on the same order of magnitude as the cPCLs, but did not

exceed their respective cPCLs. Naphthalene and dibenzofuran in MW-45C show an increasing and probably increasing trend, respectively. MW-45C is a DNAPL recovery well.

- The Ricker Method® Plume Stability Analysis and Spatial Change Indicator™ Analysis indicate decreasing trends for the five primary COCs in terms of area, average concentration (except for benzene that indicated “increasing trend”), and mass indicator. The increasing trend in average concentration for benzene within the C-TZ zone is due to the decreasing area of the plume.

D-TZ:

- No site-specific VOCs or SVOCs were detected at concentrations above cPCLs in samples collected from D-TZ wells during the 2nd semi-annual2024 sampling event.

6 NOTIFICATIONS

The groundwater data collected in the 2nd semi-annual 2024 event is being submitted to the TCEQ in this GMR. Offsite property owners, where the groundwater PCLE Zone extends off-site onto property not owned by UPRR and off-site onto the City of Houston property, will be notified of the availability of information related to the groundwater monitoring at the Site as required under 30 Texas Administrative Code §350.55(b). Harris County Appraisal District (HCAD) records were utilized to identify record owners of off-site properties for notification as reflected in Attachment D.

Notes:
ft - Feet
(B)TOC - (below) top of casing
Trace - trace DNAPL observed; product on probe, not measureable
NM - Not Measured
BP - Top of NAPL is below pump in well
Elevations relative to City of Houston Vertical Datum (1973 adjustment)

Notes:

1. All values in milligrams per liter (mg/L).
2. Concentrations > RAL and non-detects are highlighted light gray.
3. Concentrations > C/I AL and non-detects are highlighted dark gray
4. TRRP Protective Concentration Limits (PCLs) (30 TAC §350, Table 3), updated January 2021.
5. RAL = Residential Assessment Level, C/I = Commercial/Industrial
6. J = Estimated value, < = not detected at the specified detection limit, JL = estimated value, biased low, R = rejected.
7. MW-32A was screened in the B-CZ & replaced with MW-32AR
8. Based on historical data, MW-25A and MW-25C were likely mislabeled in March 2018 and results are provided correctly in this table.

Notes:

1. All values in milligrams per liter (mg/L).
2. Concentrations > RAL and non-detects are highlighted light gray.
3. Concentrations > C/I AL and non-detects are highlighted dark gray
4. TRRP Protective Concentration Limits (PCLs) (30 TAC §350, Table 3), updated January 2021.
5. RAL = Residential Assessment Level, C/I = Commercial/Industrial
6. J = Estimated value, < = not detected at the specified detection limit, JL = estimated value, biased low, R = rejected.
7. MW-32A was screened in the B-CZ & replaced with MW-32AR
8. Based on historical data, MW-25A and MW-25C were likely mislabeled in March 2018 and results are provided correctly in this table.

Metals																			
Arsenic	*0.01*	*0.01*																	

Notes:

1. All values in milligrams per liter (mg/L).
2. Concentrations > RAL and non-detects are highlighted light gray.
3. Concentrations > C/I AL and non-detects are highlighted dark gray
4. TRRP Protective Concentration Limits (PCLs) (30 TAC §350, Table 3), updated January 2021.
5. RAL = Residential Assessment Level, C/I = Commercial/Industrial
6. J = Estimated value, < = not detected at the specified detection limit, JL = estimated value, biased low, R = rejected.
7. MW-32A was screened in the B-CZ & replaced with MW-32AR
8. Based on historical data, MW-25A and MW-25C were likely mislabeled in March 2018 and results are provided correctly in this table.

Notes:

1. All values in milligrams per liter (mg/L).
2. Concentrations > RAL and non-detects are highlighted light gray.
3. Concentrations > C/I AL and non-detects are highlighted dark gray
4. TRRP Protective Concentration Limits (PCLs) (30 TAC §350, Table 3), updated January 2021.
5. RAL = Residential Assessment Level, C/I = Commercial/Industrial
6. J = Estimated value, < = not detected at the specified detection limit, JL = estimated value, biased low, R = rejected.
7. MW-32A was screened in the B-CZ & replaced with MW-32AR
8. Based on historical data, MW-25A and MW-25C were likely mislabeled in March 2018 and results are provided correctly in this table.

TABLE 2

Notes:

1. All values in milligrams per liter (mg/L).
2. Concentrations > RAL and non-detects are highlighted light gray.
3. Concentrations > C/I AL and non-detects are highlighted dark gray
4. TRRP Protective Concentration Limits (PCLs) (30 TAC §350, Table 3), updated January 2021.
5. RAL = Residential Assessment Level, C/I = Commercial/Industrial
6. J = Estimated value, < = not detected at the specified detection limit, JL = estimated value, biased low, R = rejected.
7. MW-32A was screened in the B-CZ & replaced with MW-32AR
8. Based on historical data, MW-25A and MW-25C were likely mislabeled in March 2018 and results are provided correctly in this table.

TABLE 2
ANALYTICAL RESULTS SUMMARY (2008 - 2024)

Notes:

1. All values in milligrams per liter (mg/L).
2. Concentrations > RAL and non-detects are highlighted light gray.
3. Concentrations > C/I AL and non-detects are highlighted dark gray
4. TRRP Protective Concentration Limits (PCLs) (30 TAC §350, Table 3), updated January 2021.
5. RAL = Residential Assessment Level, C/I = Commercial/Industrial
6. J = Estimated value, < = not detected at the specified detection limit, JL = estimated value, biased low, R = rejected.
7. MW-32A was screened in the B-CZ & replaced with MW-32AR
8. Based on historical data, MW-25A and MW-25C were likely mislabeled in March 2018 and results are provided correctly in this table.

Notes:

1. All values in milligrams per liter (mg/L).
2. Concentrations > RAL and non-detects are highlighted light gray.
3. Concentrations > C/I AL and non-detects are highlighted dark gray
4. TRRP Protective Concentration Limits (PCLs) (30 TAC §350, Table 3), updated January 2021.
5. RAL = Residential Assessment Level, C/I = Commercial/Industrial
6. J = Estimated value, < = not detected at the specified detection limit, JL = estimated value, biased low, R = rejected.
7. MW-32A was screened in the B-CZ & replaced with MW-32AR
8. Based on historical data, MW-25A and MW-25C were likely mislabeled in March 2018 and results are provided correctly in this table.

TABLE 2
ANALYTICAL RESULTS SUMMARY (2008 - 2024)

Notes:

1. All values in milligrams per liter (mg/L).
2. Concentrations > RAL and non-detects are highlighted light gray.
3. Concentrations > C/I AL and non-detects are highlighted dark gray
4. TRRP Protective Concentration Limits (PCLs) (30 TAC §350, Table 3), updated January 2021.
5. RAL = Residential Assessment Level, C/I = Commercial/Industrial
6. J = Estimated value, < = not detected at the specified detection limit, JL = estimated value, biased low, R = rejected.
7. MW-32A was screened in the B-CZ & replaced with MW-32AR
8. Based on historical data, MW-25A and MW-25C were likely mislabeled in March 2018 and results are provided correctly in this table.

Metals																			
Arsenic	*0.01*	*0.01*																	

Notes:
1. All values in milligrams per liter (mg/L).
2. Concentrations > RAL and non-detects are highlighted light gray.
3. Concentrations > C/I AL and non-detects are highlighted dark gray
4. TRRP Protective Concentration Limits (PCLs) (30 TAC §350, Table 3), updated January 2021.
5. RAL = Residential Assessment Level, C/I = Commercial/Industrial
6. J = Estimated value, < = not detected at the specified detection limit, JL = estimated value, biased low, R = rejected.
7. MW-32A was screened in the B-CZ & replaced with MW-32AR
8. Based on historical data, MW-25A and MW-25C were likely mislabeled in March 2018 and results are provided correctly in this table.

Arsenic	*0.01*	*0.01*																	

Notes:

1. All values in milligrams per liter (mg/L).
2. Concentrations > RAL and non-detects are highlighted light gray.
3. Concentrations > C/I AL and non-detects are highlighted dark gray
4. TRRP Protective Concentration Limits (PCLs) (30 TAC §350, Table 3), updated January 2021.
5. RAL = Residential Assessment Level, C/I = Commercial/Industrial
6. J = Estimated value, < = not detected at the specified detection limit, JL = estimated value, biased low, R = rejected.
7. MW-32A was screened in the B-CZ & replaced with MW-32AR
8. Based on historical data, MW-25A and MW-25C were likely mislabeled in March 2018 and results are provided correctly in this table.

Notes:

1. All values in milligrams per liter (mg/L).
2. Concentrations > RAL and non-detects are highlighted light gray.
3. Concentrations > C/I AL and non-detects are highlighted dark gray
4. TRRP Protective Concentration Limits (PCLs) (30 TAC §350, Table 3), updated January 2021.
5. RAL = Residential Assessment Level, C/I = Commercial/Industrial
6. J = Estimated value, < = not detected at the specified detection limit, JL = estimated value, biased low, R = rejected.
7. MW-32A was screened in the B-CZ & replaced with MW-32AR
8. Based on historical data, MW-25A and MW-25C were likely mislabeled in March 2018 and results are provided correctly in this table.

Notes:

1. All values in milligrams per liter (mg/L).
2. Concentrations > RAL and non-detects are highlighted light gray.
3. Concentrations > C/I AL and non-detects are highlighted dark gray
4. TRRP Protective Concentration Limits (PCLs) (30 TAC §350, Table 3), updated January 2021.
5. RAL = Residential Assessment Level, C/I = Commercial/Industrial
6. J = Estimated value, < = not detected at the specified detection limit, JL = estimated value, biased low, R = rejected.
7. MW-32A was screened in the B-CZ & replaced with MW-32AR
8. Based on historical data, MW-25A and MW-25C were likely mislabeled in March 2018 and results are provided correctly in this table.

Notes:

1. All values in milligrams per liter (mg/L).
2. Concentrations > RAL and non-detects are highlighted light gray.
3. Concentrations > C/I AL and non-detects are highlighted dark gray
4. TRRP Protective Concentration Limits (PCLs) (30 TAC §350, Table 3), updated January 2021.
5. RAL = Residential Assessment Level, C/I = Commercial/Industrial
6. J = Estimated value, < = not detected at the specified detection limit, JL = estimated value, biased low, R = rejected.
7. MW-32A was screened in the B-CZ & replaced with MW-32AR
8. Based on historical data, MW-25A and MW-25C were likely mislabeled in March 2018 and results are provided correctly in this table.

Notes:

1. All values in milligrams per liter (mg/L).
2. Concentrations > RAL and non-detects are highlighted light gray.
3. Concentrations > C/I AL and non-detects are highlighted dark gray
4. TRRP Protective Concentration Limits (PCLs) (30 TAC §350, Table 3), updated January 2021.
5. RAL = Residential Assessment Level, C/I = Commercial/Industrial
6. J = Estimated value, < = not detected at the specified detection limit, JL = estimated value, biased low, R = rejected.
7. MW-32A was screened in the B-CZ & replaced with MW-32AR
8. Based on historical data, MW-25A and MW-25C were likely mislabeled in March 2018 and results are provided correctly in this table.

TABLE 2
ANALYTICAL RESULTS SUMMARY (2008 - 2024)

Notes:

1. All values in milligrams per liter (mg/L).
2. Concentrations > RAL and non-detects are highlighted light gray.
3. Concentrations > C/I AL and non-detects are highlighted dark gray
4. TRRP Protective Concentration Limits (PCLs) (30 TAC §350, Table 3), updated January 2021.
5. RAL = Residential Assessment Level, C/I = Commercial/Industrial
6. J = Estimated value, < = not detected at the specified detection limit, JL = estimated value, biased low, R = rejected.
7. MW-32A was screened in the B-CZ & replaced with MW-32AR
8. Based on historical data, MW-25A and MW-25C were likely mislabeled in March 2018 and results are provided correctly in this table.

TABLE 2

Notes:

1. All values in milligrams per liter (mg/L).
2. Concentrations > RAL and non-detects are highlighted light gray.
3. Concentrations > C/I AL and non-detects are highlighted dark gray
4. TRRP Protective Concentration Limits (PCLs) (30 TAC §350, Table 3), updated January 2021.
5. RAL = Residential Assessment Level, C/I = Commercial/Industrial
6. J = Estimated value, < = not detected at the specified detection limit, JL = estimated value, biased low, R = rejected.
7. MW-32A was screened in the B-CZ & replaced with MW-32AR
8. Based on historical data, MW-25A and MW-25C were likely mislabeled in March 2018 and results are provided correctly in this table.

Notes:

1. All values in milligrams per liter (mg/L).
2. Concentrations > RAL and non-detects are highlighted light gray.
3. Concentrations > C/I AL and non-detects are highlighted dark gray
4. TRRP Protective Concentration Limits (PCLs) (30 TAC §350, Table 3), updated January 2021.
5. RAL = Residential Assessment Level, C/I = Commercial/Industrial
6. J = Estimated value, < = not detected at the specified detection limit, JL = estimated value, biased low, R = rejected.
7. MW-32A was screened in the B-CZ & replaced with MW-32AR
8. Based on historical data, MW-25A and MW-25C were likely mislabeled in March 2018 and results are provided correctly in this table.

TABLE 2

Notes:

1. All values in milligrams per liter (mg/L).
2. Concentrations > RAL and non-detects are highlighted light gray.
3. Concentrations > C/I AL and non-detects are highlighted dark gray
4. TRRP Protective Concentration Limits (PCLs) (30 TAC §350, Table 3), updated January 2021.
5. RAL = Residential Assessment Level, C/I = Commercial/Industrial
6. J = Estimated value, < = not detected at the specified detection limit, JL = estimated value, biased low, R = rejected.
7. MW-32A was screened in the B-CZ & replaced with MW-32AR
8. Based on historical data, MW-25A and MW-25C were likely mislabeled in March 2018 and results are provided correctly in this table.

TABLE 2

Notes:

1. All values in milligrams per liter (mg/L).
2. Concentrations > RAL and non-detects are highlighted light gray.
3. Concentrations > C/I AL and non-detects are highlighted dark gray
4. TRRP Protective Concentration Limits (PCLs) (30 TAC §350, Table 3), updated January 2021.
5. RAL = Residential Assessment Level, C/I = Commercial/Industrial
6. J = Estimated value, < = not detected at the specified detection limit, JL = estimated value, biased low, R = rejected.
7. MW-32A was screened in the B-CZ & replaced with MW-32AR
8. Based on historical data, MW-25A and MW-25C were likely mislabeled in March 2018 and results are provided correctly in this table.

TABLE 2
ANALYTICAL RESULTS SUMMARY (2008 - 2024)
CLASS 2 GROUNDWATER
HOUSTON, TX - WOOD PRESERVING WORKS

Notes:

1. All values in milligrams per liter (mg/L).
2. Concentrations > RAL and non-detects are highlighted light gray.
3. Concentrations > C/I AL and non-detects are highlighted dark gray
4. TRRP Protective Concentration Limits (PCLs) (30 TAC §350, Table 3), updated January 2021.
5. RAL = Residential Assessment Level, C/I = Commercial/Industrial
6. J = Estimated value, < = not detected at the specified detection limit, JL = estimated value, biased low, R = rejected.
7. MW-32A was screened in the B-CZ & replaced with MW-32AR
8. Based on historical data, MW-25A and MW-25C were likely mislabeled in March 2018 and results are provided correctly in this table.

Notes:

1. All values in milligrams per liter (mg/L).
2. Concentrations > RAL and non-detects are highlighted light gray.
3. Concentrations > C/I AL and non-detects are highlighted dark gray
4. TRRP Protective Concentration Limits (PCLs) (30 TAC §350, Table 3), updated January 2021.
5. RAL = Residential Assessment Level, C/I = Commercial/Industrial
6. J = Estimated value, < = not detected at the specified detection limit, JL = estimated value, biased low, R = rejected.
7. MW-32A was screened in the B-CZ & replaced with MW-32AR
8. Based on historical data, MW-25A and MW-25C were likely mislabeled in March 2018 and results are provided correctly in this table.

TABLE 2
ANALYTICAL RESULTS SUMMARY (2008 - 2024)
CLASS 2 GROUNDWATER
HOUSTON, TX - WOOD PRESERVING WORKS

Notes:

1. All values in milligrams per liter (mg/L).
2. Concentrations > RAL and non-detects are highlighted light gray.
3. Concentrations > C/I AL and non-detects are highlighted dark gray
4. TRRP Protective Concentration Limits (PCLs) (30 TAC §350, Table 3), updated January 2021.
5. RAL = Residential Assessment Level, C/I = Commercial/Industrial
6. J = Estimated value, < = not detected at the specified detection limit, JL = estimated value, biased low, R = rejected.
7. MW-32A was screened in the B-CZ & replaced with MW-32AR
8. Based on historical data, MW-25A and MW-25C were likely mislabeled in March 2018 and results are provided correctly in this table.

TABLE 2

6. J = Estimated value, < = not detected at the specified detection limit, JL = estimated value, biased low, R = rejected.
7. MW-32A was screened in the B-CZ & replaced with MW-32AR
8. Based on historical data, MW-25A and MW-25C were likely mislabeled in March 2018 and results are provided correctly in this table.

Notes:

1. All values in milligrams per liter (mg/L).
2. Concentrations > RAL and non-detects are highlighted light gray.
3. Concentrations > C/I AL and non-detects are highlighted dark gray
4. TRRP Protective Concentration Limits (PCLs) (30 TAC §350, Table 3), updated January 2021.
5. RAL = Residential Assessment Level, C/I = Commercial/Industrial
6. J = Estimated value, < = not detected at the specified detection limit, JL = estimated value, biased low, R = rejected.
7. MW-32A was screened in the B-CZ & replaced with MW-32AR
8. Based on historical data, MW-25A and MW-25C were likely mislabeled in March 2018 and results are provided correctly in this table.

Notes:

1. All values in milligrams per liter (mg/L).
2. Concentrations > RAL and non-detects are highlighted light gray.
3. Concentrations > C/I AL and non-detects are highlighted dark gray
4. TRRP Protective Concentration Limits (PCLs) (30 TAC §350, Table 3), updated January 2021.
5. RAL = Residential Assessment Level, C/I = Commercial/Industrial
6. J = Estimated value, < = not detected at the specified detection limit, JL = estimated value, biased low, R = rejected.
7. MW-32A was screened in the B-CZ & replaced with MW-32AR
8. Based on historical data, MW-25A and MW-25C were likely mislabeled in March 2018 and results are provided correctly in this table.

TABLE 2
ANALYTICAL RESULTS SUMMARY (2008 - 2024)
CLASS 2 GROUNDWATER
HOUSTON, TX - WOOD PRESERVING WORKS

Notes:

1. All values in milligrams per liter (mg/L).
2. Concentrations > RAL and non-detects are highlighted light gray.
3. Concentrations > C/I AL and non-detects are highlighted dark gray
4. TRRP Protective Concentration Limits (PCLs) (30 TAC §350, Table 3), updated January 2021.
5. RAL = Residential Assessment Level, C/I = Commercial/Industrial
6. J = Estimated value, < = not detected at the specified detection limit, JL = estimated value, biased low, R = rejected.
7. MW-32A was screened in the B-CZ & replaced with MW-32AR
8. Based on historical data, MW-25A and MW-25C were likely mislabeled in March 2018 and results are provided correctly in this table.

TABLE 2

Notes:

1. All values in milligrams per liter (mg/L).
2. Concentrations > RAL and non-detects are highlighted light gray.
3. Concentrations > C/I AL and non-detects are highlighted dark gray
4. TRRP Protective Concentration Limits (PCLs) (30 TAC §350, Table 3), updated January 2021.
5. RAL = Residential Assessment Level, C/I = Commercial/Industrial
6. J = Estimated value, < = not detected at the specified detection limit, JL = estimated value, biased low, R = rejected.
7. MW-32A was screened in the B-CZ & replaced with MW-32AR
8. Based on historical data, MW-25A and MW-25C were likely mislabeled in March 2018 and results are provided correctly in this table.

TABLE 2

Metals																			
Arsenic	*0.01*	*0.01*																	

Notes:

1. All values in milligrams per liter (mg/L).
2. Concentrations > RAL and non-detects are highlighted light gray.
3. Concentrations > C/I AL and non-detects are highlighted dark gray
4. TRRP Protective Concentration Limits (PCLs) (30 TAC §350, Table 3), updated January 2021.
5. RAL = Residential Assessment Level, C/I = Commercial/Industrial
6. J = Estimated value, < = not detected at the specified detection limit, JL = estimated value, biased low, R = rejected.
7. MW-32A was screened in the B-CZ & replaced with MW-32AR
8. Based on historical data, MW-25A and MW-25C were likely mislabeled in March 2018 and results are provided correctly in this table.

Notes:

1. All values in milligrams per liter (mg/L).
2. Concentrations > RAL and non-detects are highlighted light gray.
3. Concentrations > C/I AL and non-detects are highlighted dark gray
4. TRRP Protective Concentration Limits (PCLs) (30 TAC §350, Table 3), updated January 2021.
5. RAL = Residential Assessment Level, C/I = Commercial/Industrial
6. J = Estimated value, < = not detected at the specified detection limit, JL = estimated value, biased low, R = rejected.
7. MW-32A was screened in the B-CZ & replaced with MW-32AR
8. Based on historical data, MW-25A and MW-25C were likely mislabeled in March 2018 and results are provided correctly in this table.

TABLE 2

Notes:

1. All values in milligrams per liter (mg/L).
2. Concentrations > RAL and non-detects are highlighted light gray.
3. Concentrations > C/I AL and non-detects are highlighted dark gray
4. TRRP Protective Concentration Limits (PCLs) (30 TAC §350, Table 3), updated January 2021.
5. RAL = Residential Assessment Level, C/I = Commercial/Industrial
6. J = Estimated value, < = not detected at the specified detection limit, JL = estimated value, biased low, R = rejected.
7. MW-32A was screened in the B-CZ & replaced with MW-32AR
8. Based on historical data, MW-25A and MW-25C were likely mislabeled in March 2018 and results are provided correctly in this table.

TABLE 2
ANALYTICAL RESULTS SUMMARY (2008 - 2024)
CLASS 2 GROUNDWATER
HOUSTON, TX - WOOD PRESERVING WORKS

Notes:

1. All values in milligrams per liter (mg/L).
2. Concentrations > RAL and non-detects are highlighted light gray.
3. Concentrations > C/I AL and non-detects are highlighted dark gray
4. TRRP Protective Concentration Limits (PCLs) (30 TAC §350, Table 3), updated January 2021.
5. RAL = Residential Assessment Level, C/I = Commercial/Industrial
6. J = Estimated value, < = not detected at the specified detection limit, JL = estimated value, biased low, R = rejected.
7. MW-32A was screened in the B-CZ & replaced with MW-32AR
8. Based on historical data, MW-25A and MW-25C were likely mislabeled in March 2018 and results are provided correctly in this table.

TABLE 2

Notes:

1. All values in milligrams per liter (mg/L).
2. Concentrations > RAL and non-detects are highlighted light gray.
3. Concentrations > C/I AL and non-detects are highlighted dark gray
4. TRRP Protective Concentration Limits (PCLs) (30 TAC §350, Table 3), updated January 2021.
5. RAL = Residential Assessment Level, C/I = Commercial/Industrial
6. J = Estimated value, < = not detected at the specified detection limit, JL = estimated value, biased low, R = rejected.
7. MW-32A was screened in the B-CZ & replaced with MW-32AR
8. Based on historical data, MW-25A and MW-25C were likely mislabeled in March 2018 and results are provided correctly in this table.

Notes:

1. All values in milligrams per liter (mg/L).
2. Concentrations > RAL and non-detects are highlighted light gray.
3. Concentrations > C/I AL and non-detects are highlighted dark gray
4. TRRP Protective Concentration Limits (PCLs) (30 TAC §350, Table 3), updated January 2021.
5. RAL = Residential Assessment Level, C/I = Commercial/Industrial
6. J = Estimated value, < = not detected at the specified detection limit, JL = estimated value, biased low, R = rejected.
7. MW-32A was screened in the B-CZ & replaced with MW-32AR
8. Based on historical data, MW-25A and MW-25C were likely mislabeled in March 2018 and results are provided correctly in this table.

Notes:

1. All values in milligrams per liter (mg/L).
2. Concentrations > RAL and non-detects are highlighted light gray.
3. Concentrations > C/I AL and non-detects are highlighted dark gray
4. TRRP Protective Concentration Limits (PCLs) (30 TAC §350, Table 3), updated January 2021.
5. RAL = Residential Assessment Level, C/I = Commercial/Industrial
6. J = Estimated value, < = not detected at the specified detection limit, JL = estimated value, biased low, R = rejected.
7. MW-32A was screened in the B-CZ & replaced with MW-32AR
8. Based on historical data, MW-25A and MW-25C were likely mislabeled in March 2018 and results are provided correctly in this table.

TABLE 2

Notes:

1. All values in milligrams per liter (mg/L).
2. Concentrations > RAL and non-detects are highlighted light gray.
3. Concentrations > C/I AL and non-detects are highlighted dark gray
4. TRRP Protective Concentration Limits (PCLs) (30 TAC §350, Table 3), updated January 2021.
5. RAL = Residential Assessment Level, C/I = Commercial/Industrial
6. J = Estimated value, < = not detected at the specified detection limit, JL = estimated value, biased low, R = rejected.
7. MW-32A was screened in the B-CZ & replaced with MW-32AR
8. Based on historical data, MW-25A and MW-25C were likely mislabeled in March 2018 and results are provided correctly in this table.

TABLE 2

Notes:

1. All values in milligrams per liter (mg/L).
2. Concentrations > RAL and non-detects are highlighted light gray.
3. Concentrations > C/I AL and non-detects are highlighted dark gray
4. TRRP Protective Concentration Limits (PCLs) (30 TAC §350, Table 3), updated January 2021.
5. RAL = Residential Assessment Level, C/I = Commercial/Industrial
6. J = Estimated value, < = not detected at the specified detection limit, JL = estimated value, biased low, R = rejected.
7. MW-32A was screened in the B-CZ & replaced with MW-32AR
8. Based on historical data, MW-25A and MW-25C were likely mislabeled in March 2018 and results are provided correctly in this table.

Notes:

1. All values in milligrams per liter (mg/L).
2. Concentrations > RAL and non-detects are highlighted light gray.
3. Concentrations > C/I AL and non-detects are highlighted dark gray
4. TRRP Protective Concentration Limits (PCLs) (30 TAC §350, Table 3), updated January 2021.
5. RAL = Residential Assessment Level, C/I = Commercial/Industrial
6. J = Estimated value, < = not detected at the specified detection limit, JL = estimated value, biased low, R = rejected.
7. MW-32A was screened in the B-CZ & replaced with MW-32AR
8. Based on historical data, MW-25A and MW-25C were likely mislabeled in March 2018 and results are provided correctly in this table.

Notes:

1. All values in milligrams per liter (mg/L).
2. Concentrations > RAL and non-detects are highlighted light gray.
3. Concentrations > C/I AL and non-detects are highlighted dark gray
4. TRRP Protective Concentration Limits (PCLs) (30 TAC §350, Table 3), updated January 2021.
5. RAL = Residential Assessment Level, C/I = Commercial/Industrial
6. J = Estimated value, < = not detected at the specified detection limit, JL = estimated value, biased low, R = rejected.
7. MW-32A was screened in the B-CZ & replaced with MW-32AR
8. Based on historical data, MW-25A and MW-25C were likely mislabeled in March 2018 and results are provided correctly in this table.

TABLE 2
ANALYTICAL RESULTS SUMMARY (2008 - 2024)

Notes:

1. All values in milligrams per liter (mg/L).
2. Concentrations > RAL and non-detects are highlighted light gray.
3. Concentrations > C/I AL and non-detects are highlighted dark gray
4. TRRP Protective Concentration Limits (PCLs) (30 TAC §350, Table 3), updated January 2021.
5. RAL = Residential Assessment Level, C/I = Commercial/Industrial
6. J = Estimated value, < = not detected at the specified detection limit, JL = estimated value, biased low, R = rejected.
7. MW-32A was screened in the B-CZ & replaced with MW-32AR
8. Based on historical data, MW-25A and MW-25C were likely mislabeled in March 2018 and results are provided correctly in this table.

TABLE 2

Notes:

1. All values in milligrams per liter (mg/L).
2. Concentrations > RAL and non-detects are highlighted light gray.
3. Concentrations > C/I AL and non-detects are highlighted dark gray
4. TRRP Protective Concentration Limits (PCLs) (30 TAC §350, Table 3), updated January 2021.
5. RAL = Residential Assessment Level, C/I = Commercial/Industrial
6. J = Estimated value, < = not detected at the specified detection limit, JL = estimated value, biased low, R = rejected.
7. MW-32A was screened in the B-CZ & replaced with MW-32AR
8. Based on historical data, MW-25A and MW-25C were likely mislabeled in March 2018 and results are provided correctly in this table.

TABLE 2
ANALYTICAL RESULTS SUMMARY (2008 - 2024)
CLASS 2 GROUNDWATER
HOUSTON, TX - WOOD PRESERVING WORKS

Notes:

1. All values in milligrams per liter (mg/L).
2. Concentrations > RAL and non-detects are highlighted light gray.
3. Concentrations > C/I AL and non-detects are highlighted dark gray
4. TRRP Protective Concentration Limits (PCLs) (30 TAC §350, Table 3), updated January 2021.
5. RAL = Residential Assessment Level, C/I = Commercial/Industrial
6. J = Estimated value, < = not detected at the specified detection limit, JL = estimated value, biased low, R = rejected.
7. MW-32A was screened in the B-CZ & replaced with MW-32AR
8. Based on historical data, MW-25A and MW-25C were likely mislabeled in March 2018 and results are provided correctly in this table.

TABLE 2

Notes:

1. All values in milligrams per liter (mg/L).
2. Concentrations > RAL and non-detects are highlighted light gray.
3. Concentrations > C/I AL and non-detects are highlighted dark gray
4. TRRP Protective Concentration Limits (PCLs) (30 TAC §350, Table 3), updated January 2021.
5. RAL = Residential Assessment Level, C/I = Commercial/Industrial
6. J = Estimated value, < = not detected at the specified detection limit, JL = estimated value, biased low, R = rejected.
7. MW-32A was screened in the B-CZ & replaced with MW-32AR
8. Based on historical data, MW-25A and MW-25C were likely mislabeled in March 2018 and results are provided correctly in this table.

TABLE 2
ANALYTICAL RESULTS SUMMARY (2008 - 2024)

Notes:

1. All values in milligrams per liter (mg/L).
2. Concentrations > RAL and non-detects are highlighted light gray.
3. Concentrations > C/I AL and non-detects are highlighted dark gray
4. TRRP Protective Concentration Limits (PCLs) (30 TAC §350, Table 3), updated January 2021.
5. RAL = Residential Assessment Level, C/I = Commercial/Industrial
6. J = Estimated value, < = not detected at the specified detection limit, JL = estimated value, biased low, R = rejected.
7. MW-32A was screened in the B-CZ & replaced with MW-32AR
8. Based on historical data, MW-25A and MW-25C were likely mislabeled in March 2018 and results are provided correctly in this table.

TABLE 2

Notes:

1. All values in milligrams per liter (mg/L).
2. Concentrations > RAL and non-detects are highlighted light gray.
3. Concentrations > C/I AL and non-detects are highlighted dark gray
4. TRRP Protective Concentration Limits (PCLs) (30 TAC §350, Table 3), updated January 2021.
5. RAL = Residential Assessment Level, C/I = Commercial/Industrial
6. J = Estimated value, < = not detected at the specified detection limit, JL = estimated value, biased low, R = rejected.
7. MW-32A was screened in the B-CZ & replaced with MW-32AR
8. Based on historical data, MW-25A and MW-25C were likely mislabeled in March 2018 and results are provided correctly in this table.

TABLE 2

Notes:

1. All values in milligrams per liter (mg/L).
2. Concentrations > RAL and non-detects are highlighted light gray.
3. Concentrations > C/I AL and non-detects are highlighted dark gray
4. TRRP Protective Concentration Limits (PCLs) (30 TAC §350, Table 3), updated January 2021.
5. RAL = Residential Assessment Level, C/I = Commercial/Industrial
6. J = Estimated value, < = not detected at the specified detection limit, JL = estimated value, biased low, R = rejected.
7. MW-32A was screened in the B-CZ & replaced with MW-32AR
8. Based on historical data, MW-25A and MW-25C were likely mislabeled in March 2018 and results are provided correctly in this table.

Notes:

1. All values in milligrams per liter (mg/L).
2. Concentrations > RAL and non-detects are highlighted light gray.
3. Concentrations > C/I AL and non-detects are highlighted dark gray
4. TRRP Protective Concentration Limits (PCLs) (30 TAC §350, Table 3), updated January 2021.
5. RAL = Residential Assessment Level, C/I = Commercial/Industrial
6. J = Estimated value, < = not detected at the specified detection limit, JL = estimated value, biased low, R = rejected.
7. MW-32A was screened in the B-CZ & replaced with MW-32AR
8. Based on historical data, MW-25A and MW-25C were likely mislabeled in March 2018 and results are provided correctly in this table.

Notes:

1. All values in milligrams per liter (mg/L).
2. Concentrations > RAL and non-detects are highlighted light gray.
3. Concentrations > C/I AL and non-detects are highlighted dark gray
4. TRRP Protective Concentration Limits (PCLs) (30 TAC §350, Table 3), updated January 2021.
5. RAL = Residential Assessment Level, C/I = Commercial/Industrial
6. J = Estimated value, < = not detected at the specified detection limit, JL = estimated value, biased low, R = rejected.
7. MW-32A was screened in the B-CZ & replaced with MW-32AR
8. Based on historical data, MW-25A and MW-25C were likely mislabeled in March 2018 and results are provided correctly in this table.

TABLE 2

Notes:

1. All values in milligrams per liter (mg/L).
2. Concentrations > RAL and non-detects are highlighted light gray.
3. Concentrations > C/I AL and non-detects are highlighted dark gray
4. TRRP Protective Concentration Limits (PCLs) (30 TAC §350, Table 3), updated January 2021.
5. RAL = Residential Assessment Level, C/I = Commercial/Industrial
6. J = Estimated value, < = not detected at the specified detection limit, JL = estimated value, biased low, R = rejected.
7. MW-32A was screened in the B-CZ & replaced with MW-32AR
8. Based on historical data, MW-25A and MW-25C were likely mislabeled in March 2018 and results are provided correctly in this table.

TABLE 2

Notes:

1. All values in milligrams per liter (mg/L).
2. Concentrations > RAL and non-detects are highlighted light gray.
3. Concentrations > C/I AL and non-detects are highlighted dark gray
4. TRRP Protective Concentration Limits (PCLs) (30 TAC §350, Table 3), updated January 2021.
5. RAL = Residential Assessment Level, C/I = Commercial/Industrial
6. J = Estimated value, < = not detected at the specified detection limit, JL = estimated value, biased low, R = rejected.
7. MW-32A was screened in the B-CZ & replaced with MW-32AR
8. Based on historical data, MW-25A and MW-25C were likely mislabeled in March 2018 and results are provided correctly in this table.

Notes:

1. All values in milligrams per liter (mg/L).
2. Concentrations > RAL and non-detects are highlighted light gray.
3. Concentrations > C/I AL and non-detects are highlighted dark gray
4. TRRP Protective Concentration Limits (PCLs) (30 TAC §350, Table 3), updated January 2021.
5. RAL = Residential Assessment Level, C/I = Commercial/Industrial
6. J = Estimated value, < = not detected at the specified detection limit, JL = estimated value, biased low, R = rejected.
7. MW-32A was screened in the B-CZ & replaced with MW-32AR
8. Based on historical data, MW-25A and MW-25C were likely mislabeled in March 2018 and results are provided correctly in this table.

TABLE 2

Notes:

1. All values in milligrams per liter (mg/L).
2. Concentrations > RAL and non-detects are highlighted light gray.
3. Concentrations > C/I AL and non-detects are highlighted dark gray
4. TRRP Protective Concentration Limits (PCLs) (30 TAC §350, Table 3), updated January 2021.
5. RAL = Residential Assessment Level, C/I = Commercial/Industrial
6. J = Estimated value, < = not detected at the specified detection limit, JL = estimated value, biased low, R = rejected.
7. MW-32A was screened in the B-CZ & replaced with MW-32AR
8. Based on historical data, MW-25A and MW-25C were likely mislabeled in March 2018 and results are provided correctly in this table.

TABLE 2

Notes:

1. All values in milligrams per liter (mg/L).
2. Concentrations > RAL and non-detects are highlighted light gray.
3. Concentrations > C/I AL and non-detects are highlighted dark gray
4. TRRP Protective Concentration Limits (PCLs) (30 TAC §350, Table 3), updated January 2021.
5. RAL = Residential Assessment Level, C/I = Commercial/Industrial
6. J = Estimated value, < = not detected at the specified detection limit, JL = estimated value, biased low, R = rejected.
7. MW-32A was screened in the B-CZ & replaced with MW-32AR
8. Based on historical data, MW-25A and MW-25C were likely mislabeled in March 2018 and results are provided correctly in this table.

TABLE 2
ANALYTICAL RESULTS SUMMARY (2008 - 2024)

Notes:

1. All values in milligrams per liter (mg/L).
2. Concentrations > RAL and non-detects are highlighted light gray.
3. Concentrations > C/I AL and non-detects are highlighted dark gray
4. TRRP Protective Concentration Limits (PCLs) (30 TAC §350, Table 3), updated January 2021.
5. RAL = Residential Assessment Level, C/I = Commercial/Industrial
6. J = Estimated value, < = not detected at the specified detection limit, JL = estimated value, biased low, R = rejected.
7. MW-32A was screened in the B-CZ & replaced with MW-32AR
8. Based on historical data, MW-25A and MW-25C were likely mislabeled in March 2018 and results are provided correctly in this table.

Notes:

1. All values in milligrams per liter (mg/L).
2. Concentrations > RAL and non-detects are highlighted light gray.
3. Concentrations > C/I AL and non-detects are highlighted dark gray
4. TRRP Protective Concentration Limits (PCLs) (30 TAC §350, Table 3), updated January 2021.
5. RAL = Residential Assessment Level, C/I = Commercial/Industrial
6. J = Estimated value, < = not detected at the specified detection limit, JL = estimated value, biased low, R = rejected.
7. MW-32A was screened in the B-CZ & replaced with MW-32AR
8. Based on historical data, MW-25A and MW-25C were likely mislabeled in March 2018 and results are provided correctly in this table.

TABLE 2

Notes:

1. All values in milligrams per liter (mg/L).
2. Concentrations > RAL and non-detects are highlighted light gray.
3. Concentrations > C/I AL and non-detects are highlighted dark gray
4. TRRP Protective Concentration Limits (PCLs) (30 TAC §350, Table 3), updated January 2021.
5. RAL = Residential Assessment Level, C/I = Commercial/Industrial
6. J = Estimated value, < = not detected at the specified detection limit, JL = estimated value, biased low, R = rejected.
7. MW-32A was screened in the B-CZ & replaced with MW-32AR
8. Based on historical data, MW-25A and MW-25C were likely mislabeled in March 2018 and results are provided correctly in this table.

TABLE 2
ANALYTICAL RESULTS SUMMARY (2008 - 2024)

Notes:

1. All values in milligrams per liter (mg/L).
2. Concentrations > RAL and non-detects are highlighted light gray.
3. Concentrations > C/I AL and non-detects are highlighted dark gray
4. TRRP Protective Concentration Limits (PCLs) (30 TAC §350, Table 3), updated January 2021.
5. RAL = Residential Assessment Level, C/I = Commercial/Industrial
6. J = Estimated value, < = not detected at the specified detection limit, JL = estimated value, biased low, R = rejected.
7. MW-32A was screened in the B-CZ & replaced with MW-32AR
8. Based on historical data, MW-25A and MW-25C were likely mislabeled in March 2018 and results are provided correctly in this table.

TABLE 2

Notes:

1. All values in milligrams per liter (mg/L).
2. Concentrations > RAL and non-detects are highlighted light gray.
3. Concentrations > C/I AL and non-detects are highlighted dark gray
4. TRRP Protective Concentration Limits (PCLs) (30 TAC §350, Table 3), updated January 2021.
5. RAL = Residential Assessment Level, C/I = Commercial/Industrial
6. J = Estimated value, < = not detected at the specified detection limit, JL = estimated value, biased low, R = rejected.
7. MW-32A was screened in the B-CZ & replaced with MW-32AR
8. Based on historical data, MW-25A and MW-25C were likely mislabeled in March 2018 and results are provided correctly in this table.

Notes:

1. All values in milligrams per liter (mg/L).
2. Concentrations > RAL and non-detects are highlighted light gray.
3. Concentrations > C/I AL and non-detects are highlighted dark gray
4. TRRP Protective Concentration Limits (PCLs) (30 TAC §350, Table 3), updated January 2021.
5. RAL = Residential Assessment Level, C/I = Commercial/Industrial
6. J = Estimated value, < = not detected at the specified detection limit, JL = estimated value, biased low, R = rejected.
7. MW-32A was screened in the B-CZ & replaced with MW-32AR
8. Based on historical data, MW-25A and MW-25C were likely mislabeled in March 2018 and results are provided correctly in this table.

Notes:

1. All values in milligrams per liter (mg/L).
2. Concentrations > RAL and non-detects are highlighted light gray.
3. Concentrations > C/I AL and non-detects are highlighted dark gray
4. TRRP Protective Concentration Limits (PCLs) (30 TAC §350, Table 3), updated January 2021.
5. RAL = Residential Assessment Level, C/I = Commercial/Industrial
6. J = Estimated value, < = not detected at the specified detection limit, JL = estimated value, biased low, R = rejected.
7. MW-32A was screened in the B-CZ & replaced with MW-32AR
8. Based on historical data, MW-25A and MW-25C were likely mislabeled in March 2018 and results are provided correctly in this table.

TABLE 2
ANALYTICAL RESULTS SUMMARY (2008 - 2024)

Notes:

1. All values in milligrams per liter (mg/L).
2. Concentrations > RAL and non-detects are highlighted light gray.
3. Concentrations > C/I AL and non-detects are highlighted dark gray
4. TRRP Protective Concentration Limits (PCLs) (30 TAC §350, Table 3), updated January 2021.
5. RAL = Residential Assessment Level, C/I = Commercial/Industrial
6. J = Estimated value, < = not detected at the specified detection limit, JL = estimated value, biased low, R = rejected.
7. MW-32A was screened in the B-CZ & replaced with MW-32AR
8. Based on historical data, MW-25A and MW-25C were likely mislabeled in March 2018 and results are provided correctly in this table.

Notes:

1. All values in milligrams per liter (mg/L).
2. Concentrations > RAL and non-detects are highlighted light gray.
3. Concentrations > C/I AL and non-detects are highlighted dark gray
4. TRRP Protective Concentration Limits (PCLs) (30 TAC §350, Table 3), updated January 2021.
5. RAL = Residential Assessment Level, C/I = Commercial/Industrial
6. J = Estimated value, < = not detected at the specified detection limit, JL = estimated value, biased low, R = rejected.
7. MW-32A was screened in the B-CZ & replaced with MW-32AR
8. Based on historical data, MW-25A and MW-25C were likely mislabeled in March 2018 and results are provided correctly in this table.

TABLE 2

4. TRRP Protective Concentration Limits (PCLs) (30 TAC §350, Table 3), updated January 2021.
5. RAL = Residential Assessment Level, C/I = Commercial/Industrial
6. J = Estimated value, < = not detected at the specified detection limit, JL = estimated value, biased low, R = rejected.
7. MW-32A was screened in the B-CZ & replaced with MW-32AR
8. Based on historical data, MW-25A and MW-25C were likely mislabeled in March 2018 and results are provided correctly in this table.

Notes:

1. All values in milligrams per liter (mg/L).
2. Concentrations > RAL and non-detects are highlighted light gray.
3. Concentrations > C/I AL and non-detects are highlighted dark gray
4. TRRP Protective Concentration Limits (PCLs) (30 TAC §350, Table 3), updated January 2021.
5. RAL = Residential Assessment Level, C/I = Commercial/Industrial
6. J = Estimated value, < = not detected at the specified detection limit, JL = estimated value, biased low, R = rejected.
7. MW-32A was screened in the B-CZ & replaced with MW-32AR
8. Based on historical data, MW-25A and MW-25C were likely mislabeled in March 2018 and results are provided correctly in this table.

Notes:

1. All values in milligrams per liter (mg/L).
2. Concentrations > RAL and non-detects are highlighted light gray.
3. Concentrations > C/I AL and non-detects are highlighted dark gray
4. TRRP Protective Concentration Limits (PCLs) (30 TAC §350, Table 3), updated January 2021.
5. RAL = Residential Assessment Level, C/I = Commercial/Industrial
6. J = Estimated value, < = not detected at the specified detection limit, JL = estimated value, biased low, R = rejected.
7. MW-32A was screened in the B-CZ & replaced with MW-32AR
8. Based on historical data, MW-25A and MW-25C were likely mislabeled in March 2018 and results are provided correctly in this table.

Notes:

1. All values in milligrams per liter (mg/L).
2. Concentrations > RAL and non-detects are highlighted light gray.
3. Concentrations > C/I AL and non-detects are highlighted dark gray
4. TRRP Protective Concentration Limits (PCLs) (30 TAC §350, Table 3), updated January 2021.
5. RAL = Residential Assessment Level, C/I = Commercial/Industrial
6. J = Estimated value, < = not detected at the specified detection limit, JL = estimated value, biased low, R = rejected.
7. MW-32A was screened in the B-CZ & replaced with MW-32AR
8. Based on historical data, MW-25A and MW-25C were likely mislabeled in March 2018 and results are provided correctly in this table.

TABLE 2
ANALYTICAL RESULTS SUMMARY (2008 - 2024)
CLASS 2 GROUNDWATER
HOUSTON, TX - WOOD PRESERVING WORKS

Notes:

1. All values in milligrams per liter (mg/L).
2. Concentrations > RAL and non-detects are highlighted light gray.
3. Concentrations > C/I AL and non-detects are highlighted dark gray
4. TRRP Protective Concentration Limits (PCLs) (30 TAC §350, Table 3), updated January 2021.
5. RAL = Residential Assessment Level, C/I = Commercial/Industrial
6. J = Estimated value, < = not detected at the specified detection limit, JL = estimated value, biased low, R = rejected.
7. MW-32A was screened in the B-CZ & replaced with MW-32AR
8. Based on historical data, MW-25A and MW-25C were likely mislabeled in March 2018 and results are provided correctly in this table.

TABLE 2
ANALYTICAL RESULTS SUMMARY (2008 - 2024)

Notes:

1. All values in milligrams per liter (mg/L).
2. Concentrations > RAL and non-detects are highlighted light gray.
3. Concentrations > C/I AL and non-detects are highlighted dark gray
4. TRRP Protective Concentration Limits (PCLs) (30 TAC §350, Table 3), updated January 2021.
5. RAL = Residential Assessment Level, C/I = Commercial/Industrial
6. J = Estimated value, < = not detected at the specified detection limit, JL = estimated value, biased low, R = rejected.
7. MW-32A was screened in the B-CZ & replaced with MW-32AR
8. Based on historical data, MW-25A and MW-25C were likely mislabeled in March 2018 and results are provided correctly in this table.

Notes:

1. All values in milligrams per liter (mg/L).
2. Concentrations > RAL and non-detects are highlighted light gray.
3. Concentrations > C/I AL and non-detects are highlighted dark gray
4. TRRP Protective Concentration Limits (PCLs) (30 TAC §350, Table 3), updated January 2021.
5. RAL = Residential Assessment Level, C/I = Commercial/Industrial
6. J = Estimated value, < = not detected at the specified detection limit, JL = estimated value, biased low, R = rejected.
7. MW-32A was screened in the B-CZ & replaced with MW-32AR
8. Based on historical data, MW-25A and MW-25C were likely mislabeled in March 2018 and results are provided correctly in this table.

Notes:

1. All values in milligrams per liter (mg/L).
2. Concentrations > RAL and non-detects are highlighted light gray.
3. Concentrations > C/I AL and non-detects are highlighted dark gray
4. TRRP Protective Concentration Limits (PCLs) (30 TAC §350, Table 3), updated January 2021.
5. RAL = Residential Assessment Level, C/I = Commercial/Industrial
6. J = Estimated value, < = not detected at the specified detection limit, JL = estimated value, biased low, R = rejected.
7. MW-32A was screened in the B-CZ & replaced with MW-32AR
8. Based on historical data, MW-25A and MW-25C were likely mislabeled in March 2018 and results are provided correctly in this table.

TABLE 2

Notes:

1. All values in milligrams per liter (mg/L).
2. Concentrations > RAL and non-detects are highlighted light gray.
3. Concentrations > C/I AL and non-detects are highlighted dark gray
4. TRRP Protective Concentration Limits (PCLs) (30 TAC §350, Table 3), updated January 2021.
5. RAL = Residential Assessment Level, C/I = Commercial/Industrial
6. J = Estimated value, < = not detected at the specified detection limit, JL = estimated value, biased low, R = rejected.
7. MW-32A was screened in the B-CZ & replaced with MW-32AR
8. Based on historical data, MW-25A and MW-25C were likely mislabeled in March 2018 and results are provided correctly in this table.

TABLE 2
ANALYTICAL RESULTS SUMMARY (2008 - 2024)

Notes:

1. All values in milligrams per liter (mg/L).
2. Concentrations > RAL and non-detects are highlighted light gray.
3. Concentrations > C/I AL and non-detects are highlighted dark gray
4. TRRP Protective Concentration Limits (PCLs) (30 TAC §350, Table 3), updated January 2021.
5. RAL = Residential Assessment Level, C/I = Commercial/Industrial
6. J = Estimated value, < = not detected at the specified detection limit, JL = estimated value, biased low, R = rejected.
7. MW-32A was screened in the B-CZ & replaced with MW-32AR
8. Based on historical data, MW-25A and MW-25C were likely mislabeled in March 2018 and results are provided correctly in this table.

TABLE 2

Notes:

1. All values in milligrams per liter (mg/L).
2. Concentrations > RAL and non-detects are highlighted light gray.
3. Concentrations > C/I AL and non-detects are highlighted dark gray
4. TRRP Protective Concentration Limits (PCLs) (30 TAC §350, Table 3), updated January 2021.
5. RAL = Residential Assessment Level, C/I = Commercial/Industrial
6. J = Estimated value, < = not detected at the specified detection limit, JL = estimated value, biased low, R = rejected.
7. MW-32A was screened in the B-CZ & replaced with MW-32AR
8. Based on historical data, MW-25A and MW-25C were likely mislabeled in March 2018 and results are provided correctly in this table.

Notes:

1. All values in milligrams per liter (mg/L).
2. Concentrations > RAL and non-detects are highlighted light gray.
3. Concentrations > C/I AL and non-detects are highlighted dark gray
4. TRRP Protective Concentration Limits (PCLs) (30 TAC §350, Table 3), updated January 2021.
5. RAL = Residential Assessment Level, C/I = Commercial/Industrial
6. J = Estimated value, < = not detected at the specified detection limit, JL = estimated value, biased low, R = rejected.
7. MW-32A was screened in the B-CZ & replaced with MW-32AR
8. Based on historical data, MW-25A and MW-25C were likely mislabeled in March 2018 and results are provided correctly in this table.

TABLE 2
ANALYTICAL RESULTS SUMMARY (2008 - 2024)
CLASS 2 GROUNDWATER
HOUSTON, TX - WOOD PRESERVING WORKS

Notes:

1. All values in milligrams per liter (mg/L).
2. Concentrations > RAL and non-detects are highlighted light gray.
3. Concentrations > C/I AL and non-detects are highlighted dark gray
4. TRRP Protective Concentration Limits (PCLs) (30 TAC §350, Table 3), updated January 2021.
5. RAL = Residential Assessment Level, C/I = Commercial/Industrial
6. J = Estimated value, < = not detected at the specified detection limit, JL = estimated value, biased low, R = rejected.
7. MW-32A was screened in the B-CZ & replaced with MW-32AR
8. Based on historical data, MW-25A and MW-25C were likely mislabeled in March 2018 and results are provided correctly in this table.

TABLE 2
ANALYTICAL RESULTS SUMMARY (2008 - 2024)
CLASS 2 GROUNDWATER
HOUSTON, TX - WOOD PRESERVING WORKS

Notes:

1. All values in milligrams per liter (mg/L).
2. Concentrations > RAL and non-detects are highlighted light gray.
3. Concentrations > C/I AL and non-detects are highlighted dark gray
4. TRRP Protective Concentration Limits (PCLs) (30 TAC §350, Table 3), updated January 2021.
5. RAL = Residential Assessment Level, C/I = Commercial/Industrial
6. J = Estimated value, < = not detected at the specified detection limit, JL = estimated value, biased low, R = rejected.
7. MW-32A was screened in the B-CZ & replaced with MW-32AR
8. Based on historical data, MW-25A and MW-25C were likely mislabeled in March 2018 and results are provided correctly in this table.

TABLE 2

Notes:

1. All values in milligrams per liter (mg/L).
2. Concentrations > RAL and non-detects are highlighted light gray.
3. Concentrations > C/I AL and non-detects are highlighted dark gray
4. TRRP Protective Concentration Limits (PCLs) (30 TAC §350, Table 3), updated January 2021.
5. RAL = Residential Assessment Level, C/I = Commercial/Industrial
6. J = Estimated value, < = not detected at the specified detection limit, JL = estimated value, biased low, R = rejected.
7. MW-32A was screened in the B-CZ & replaced with MW-32AR
8. Based on historical data, MW-25A and MW-25C were likely mislabeled in March 2018 and results are provided correctly in this table.

Notes:

1. All values in milligrams per liter (mg/L).
2. Concentrations > RAL and non-detects are highlighted light gray.
3. Concentrations > C/I AL and non-detects are highlighted dark gray
4. TRRP Protective Concentration Limits (PCLs) (30 TAC §350, Table 3), updated January 2021.
5. RAL = Residential Assessment Level, C/I = Commercial/Industrial
6. J = Estimated value, < = not detected at the specified detection limit, JL = estimated value, biased low, R = rejected.
7. MW-32A was screened in the B-CZ & replaced with MW-32AR
8. Based on historical data, MW-25A and MW-25C were likely mislabeled in March 2018 and results are provided correctly in this table.

TABLE 2

Notes:

1. All values in milligrams per liter (mg/L).
2. Concentrations > RAL and non-detects are highlighted light gray.
3. Concentrations > C/I AL and non-detects are highlighted dark gray
4. TRRP Protective Concentration Limits (PCLs) (30 TAC §350, Table 3), updated January 2021.
5. RAL = Residential Assessment Level, C/I = Commercial/Industrial
6. J = Estimated value, < = not detected at the specified detection limit, JL = estimated value, biased low, R = rejected.
7. MW-32A was screened in the B-CZ & replaced with MW-32AR
8. Based on historical data, MW-25A and MW-25C were likely mislabeled in March 2018 and results are provided correctly in this table.

TABLE 2
ANALYTICAL RESULTS SUMMARY (2008 - 2024)
CLASS 2 GROUNDWATER
HOUSTON, TX - WOOD PRESERVING WORKS

Notes:

1. All values in milligrams per liter (mg/L).
2. Concentrations > RAL and non-detects are highlighted light gray.
3. Concentrations > C/I AL and non-detects are highlighted dark gray
4. TRRP Protective Concentration Limits (PCLs) (30 TAC §350, Table 3), updated January 2021.
5. RAL = Residential Assessment Level, C/I = Commercial/Industrial
6. J = Estimated value, < = not detected at the specified detection limit, JL = estimated value, biased low, R = rejected.
7. MW-32A was screened in the B-CZ & replaced with MW-32AR
8. Based on historical data, MW-25A and MW-25C were likely mislabeled in March 2018 and results are provided correctly in this table.

TABLE 2
ANALYTICAL RESULTS SUMMARY (2008 - 2024)

Notes:

1. All values in milligrams per liter (mg/L).
2. Concentrations > RAL and non-detects are highlighted light gray.
3. Concentrations > C/I AL and non-detects are highlighted dark gray
4. TRRP Protective Concentration Limits (PCLs) (30 TAC §350, Table 3), updated January 2021.
5. RAL = Residential Assessment Level, C/I = Commercial/Industrial
6. J = Estimated value, < = not detected at the specified detection limit, JL = estimated value, biased low, R = rejected.
7. MW-32A was screened in the B-CZ & replaced with MW-32AR
8. Based on historical data, MW-25A and MW-25C were likely mislabeled in March 2018 and results are provided correctly in this table.

TABLE 2

Notes:

1. All values in milligrams per liter (mg/L).
2. Concentrations > RAL and non-detects are highlighted light gray.
3. Concentrations > C/I AL and non-detects are highlighted dark gray
4. TRRP Protective Concentration Limits (PCLs) (30 TAC §350, Table 3), updated January 2021.
5. RAL = Residential Assessment Level, C/I = Commercial/Industrial
6. J = Estimated value, < = not detected at the specified detection limit, JL = estimated value, biased low, R = rejected.
7. MW-32A was screened in the B-CZ & replaced with MW-32AR
8. Based on historical data, MW-25A and MW-25C were likely mislabeled in March 2018 and results are provided correctly in this table.

Notes:

1. All values in milligrams per liter (mg/L).
2. Concentrations > RAL and non-detects are highlighted light gray.
3. Concentrations > C/I AL and non-detects are highlighted dark gray
4. TRRP Protective Concentration Limits (PCLs) (30 TAC §350, Table 3), updated January 2021.
5. RAL = Residential Assessment Level, C/I = Commercial/Industrial
6. J = Estimated value, < = not detected at the specified detection limit, JL = estimated value, biased low, R = rejected.
7. MW-32A was screened in the B-CZ & replaced with MW-32AR
8. Based on historical data, MW-25A and MW-25C were likely mislabeled in March 2018 and results are provided correctly in this table.

Notes:

1. All values in milligrams per liter (mg/L).
2. Concentrations > RAL and non-detects are highlighted light gray.
3. Concentrations > C/I AL and non-detects are highlighted dark gray
4. TRRP Protective Concentration Limits (PCLs) (30 TAC §350, Table 3), updated January 2021.
5. RAL = Residential Assessment Level, C/I = Commercial/Industrial
6. J = Estimated value, < = not detected at the specified detection limit, JL = estimated value, biased low, R = rejected.
7. MW-32A was screened in the B-CZ & replaced with MW-32AR
8. Based on historical data, MW-25A and MW-25C were likely mislabeled in March 2018 and results are provided correctly in this table.

Notes:

1. All values in milligrams per liter (mg/L).
2. Concentrations > RAL and non-detects are highlighted light gray.
3. Concentrations > C/I AL and non-detects are highlighted dark gray
4. TRRP Protective Concentration Limits (PCLs) (30 TAC §350, Table 3), updated January 2021.
5. RAL = Residential Assessment Level, C/I = Commercial/Industrial
6. J = Estimated value, < = not detected at the specified detection limit, JL = estimated value, biased low, R = rejected.
7. MW-32A was screened in the B-CZ & replaced with MW-32AR
8. Based on historical data, MW-25A and MW-25C were likely mislabeled in March 2018 and results are provided correctly in this table.

TABLE 2

Notes:

1. All values in milligrams per liter (mg/L).
2. Concentrations > RAL and non-detects are highlighted light gray.
3. Concentrations > C/I AL and non-detects are highlighted dark gray
4. TRRP Protective Concentration Limits (PCLs) (30 TAC §350, Table 3), updated January 2021.
5. RAL = Residential Assessment Level, C/I = Commercial/Industrial
6. J = Estimated value, < = not detected at the specified detection limit, JL = estimated value, biased low, R = rejected.
7. MW-32A was screened in the B-CZ & replaced with MW-32AR
8. Based on historical data, MW-25A and MW-25C were likely mislabeled in March 2018 and results are provided correctly in this table.

TABLE 2
ANALYTICAL RESULTS SUMMARY (2008 - 2024)
CLASS 2 GROUNDWATER
HOUSTON, TX - WOOD PRESERVING WORKS

Notes:

1. All values in milligrams per liter (mg/L).
2. Concentrations > RAL and non-detects are highlighted light gray.
3. Concentrations > C/I AL and non-detects are highlighted dark gray
4. TRRP Protective Concentration Limits (PCLs) (30 TAC §350, Table 3), updated January 2021.
5. RAL = Residential Assessment Level, C/I = Commercial/Industrial
6. J = Estimated value, < = not detected at the specified detection limit, JL = estimated value, biased low, R = rejected.
7. MW-32A was screened in the B-CZ & replaced with MW-32AR
8. Based on historical data, MW-25A and MW-25C were likely mislabeled in March 2018 and results are provided correctly in this table.

Notes:

1. All values in milligrams per liter (mg/L).
2. Concentrations > RAL and non-detects are highlighted light gray.
3. Concentrations > C/I AL and non-detects are highlighted dark gray
4. TRRP Protective Concentration Limits (PCLs) (30 TAC §350, Table 3), updated January 2021.
5. RAL = Residential Assessment Level, C/I = Commercial/Industrial
6. J = Estimated value, < = not detected at the specified detection limit, JL = estimated value, biased low, R = rejected.
7. MW-32A was screened in the B-CZ & replaced with MW-32AR
8. Based on historical data, MW-25A and MW-25C were likely mislabeled in March 2018 and results are provided correctly in this table.

Notes:

1. All values in milligrams per liter (mg/L).
2. Concentrations > RAL and non-detects are highlighted light gray.
3. Concentrations > C/I AL and non-detects are highlighted dark gray
4. TRRP Protective Concentration Limits (PCLs) (30 TAC §350, Table 3), updated January 2021.
5. RAL = Residential Assessment Level, C/I = Commercial/Industrial
6. J = Estimated value, < = not detected at the specified detection limit, JL = estimated value, biased low, R = rejected.
7. MW-32A was screened in the B-CZ & replaced with MW-32AR
8. Based on historical data, MW-25A and MW-25C were likely mislabeled in March 2018 and results are provided correctly in this table.

TABLE 2

Notes:

1. All values in milligrams per liter (mg/L).
2. Concentrations > RAL and non-detects are highlighted light gray.
3. Concentrations > C/I AL and non-detects are highlighted dark gray
4. TRRP Protective Concentration Limits (PCLs) (30 TAC §350, Table 3), updated January 2021.
5. RAL = Residential Assessment Level, C/I = Commercial/Industrial
6. J = Estimated value, < = not detected at the specified detection limit, JL = estimated value, biased low, R = rejected.
7. MW-32A was screened in the B-CZ & replaced with MW-32AR
8. Based on historical data, MW-25A and MW-25C were likely mislabeled in March 2018 and results are provided correctly in this table.

TABLE 2

Notes:

1. All values in milligrams per liter (mg/L).
2. Concentrations > RAL and non-detects are highlighted light gray.
3. Concentrations > C/I AL and non-detects are highlighted dark gray
4. TRRP Protective Concentration Limits (PCLs) (30 TAC §350, Table 3), updated January 2021.
5. RAL = Residential Assessment Level, C/I = Commercial/Industrial
6. J = Estimated value, < = not detected at the specified detection limit, JL = estimated value, biased low, R = rejected.
7. MW-32A was screened in the B-CZ & replaced with MW-32AR
8. Based on historical data, MW-25A and MW-25C were likely mislabeled in March 2018 and results are provided correctly in this table.

Notes:

1. All values in milligrams per liter (mg/L).
2. Concentrations > RAL and non-detects are highlighted light gray.
3. Concentrations > C/I AL and non-detects are highlighted dark gray
4. TRRP Protective Concentration Limits (PCLs) (30 TAC §350, Table 3), updated January 2021.
5. RAL = Residential Assessment Level, C/I = Commercial/Industrial
6. J = Estimated value, < = not detected at the specified detection limit, JL = estimated value, biased low, R = rejected.
7. MW-32A was screened in the B-CZ & replaced with MW-32AR
8. Based on historical data, MW-25A and MW-25C were likely mislabeled in March 2018 and results are provided correctly in this table.

TABLE 2
ANALYTICAL RESULTS SUMMARY (2008 - 2024)

Notes:

1. All values in milligrams per liter (mg/L).
2. Concentrations > RAL and non-detects are highlighted light gray.
3. Concentrations > C/I AL and non-detects are highlighted dark gray
4. TRRP Protective Concentration Limits (PCLs) (30 TAC §350, Table 3), updated January 2021.
5. RAL = Residential Assessment Level, C/I = Commercial/Industrial
6. J = Estimated value, < = not detected at the specified detection limit, JL = estimated value, biased low, R = rejected.
7. MW-32A was screened in the B-CZ & replaced with MW-32AR
8. Based on historical data, MW-25A and MW-25C were likely mislabeled in March 2018 and results are provided correctly in this table.

TABLE 2
ANALYTICAL RESULTS SUMMARY (2008 - 2024)
CLASS 2 GROUNDWATER
HOUSTON, TX - WOOD PRESERVING WORKS

Notes:

1. All values in milligrams per liter (mg/L).
2. Concentrations > RAL and non-detects are highlighted light gray.
3. Concentrations > C/I AL and non-detects are highlighted dark gray
4. TRRP Protective Concentration Limits (PCLs) (30 TAC §350, Table 3), updated January 2021.
5. RAL = Residential Assessment Level, C/I = Commercial/Industrial
6. J = Estimated value, < = not detected at the specified detection limit, JL = estimated value, biased low, R = rejected.
7. MW-32A was screened in the B-CZ & replaced with MW-32AR
8. Based on historical data, MW-25A and MW-25C were likely mislabeled in March 2018 and results are provided correctly in this table.

TABLE 2
ANALYTICAL RESULTS SUMMARY (2008 - 2024)
CLASS 2 GROUNDWATER
HOUSTON, TX - WOOD PRESERVING WORKS

Notes:

1. All values in milligrams per liter (mg/L).
2. Concentrations > RAL and non-detects are highlighted light gray.
3. Concentrations > C/I AL and non-detects are highlighted dark gray
4. TRRP Protective Concentration Limits (PCLs) (30 TAC §350, Table 3), updated January 2021.
5. RAL = Residential Assessment Level, C/I = Commercial/Industrial
6. J = Estimated value, < = not detected at the specified detection limit, JL = estimated value, biased low, R = rejected.
7. MW-32A was screened in the B-CZ & replaced with MW-32AR
8. Based on historical data, MW-25A and MW-25C were likely mislabeled in March 2018 and results are provided correctly in this table.

Notes:

1. All values in milligrams per liter (mg/L).
2. Concentrations > RAL and non-detects are highlighted light gray.
3. Concentrations > C/I AL and non-detects are highlighted dark gray
4. TRRP Protective Concentration Limits (PCLs) (30 TAC §350, Table 3), updated January 2021.
5. RAL = Residential Assessment Level, C/I = Commercial/Industrial
6. J = Estimated value, < = not detected at the specified detection limit, JL = estimated value, biased low, R = rejected.
7. MW-32A was screened in the B-CZ & replaced with MW-32AR
8. Based on historical data, MW-25A and MW-25C were likely mislabeled in March 2018 and results are provided correctly in this table.

Notes:

1. All values in milligrams per liter (mg/L).
2. Concentrations > RAL and non-detects are highlighted light gray.
3. Concentrations > C/I AL and non-detects are highlighted dark gray
4. TRRP Protective Concentration Limits (PCLs) (30 TAC §350, Table 3), updated January 2021.
5. RAL = Residential Assessment Level, C/I = Commercial/Industrial
6. J = Estimated value, < = not detected at the specified detection limit, JL = estimated value, biased low, R = rejected.
7. MW-32A was screened in the B-CZ & replaced with MW-32AR
8. Based on historical data, MW-25A and MW-25C were likely mislabeled in March 2018 and results are provided correctly in this table.

Notes:

1. All values in milligrams per liter (mg/L).
2. Concentrations > RAL and non-detects are highlighted light gray.
3. Concentrations > C/I AL and non-detects are highlighted dark gray
4. TRRP Protective Concentration Limits (PCLs) (30 TAC §350, Table 3), updated January 2021.
5. RAL = Residential Assessment Level, C/I = Commercial/Industrial
6. J = Estimated value, < = not detected at the specified detection limit, JL = estimated value, biased low, R = rejected.
7. MW-32A was screened in the B-CZ & replaced with MW-32AR
8. Based on historical data, MW-25A and MW-25C were likely mislabeled in March 2018 and results are provided correctly in this table.

TABLE 2

Notes:

1. All values in milligrams per liter (mg/L).
2. Concentrations > RAL and non-detects are highlighted light gray.
3. Concentrations > C/I AL and non-detects are highlighted dark gray
4. TRRP Protective Concentration Limits (PCLs) (30 TAC §350, Table 3), updated January 2021.
5. RAL = Residential Assessment Level, C/I = Commercial/Industrial
6. J = Estimated value, < = not detected at the specified detection limit, JL = estimated value, biased low, R = rejected.
7. MW-32A was screened in the B-CZ & replaced with MW-32AR
8. Based on historical data, MW-25A and MW-25C were likely mislabeled in March 2018 and results are provided correctly in this table.

TABLE 2

Notes:

1. All values in milligrams per liter (mg/L).
2. Concentrations > RAL and non-detects are highlighted light gray.
3. Concentrations > C/I AL and non-detects are highlighted dark gray
4. TRRP Protective Concentration Limits (PCLs) (30 TAC §350, Table 3), updated January 2021.
5. RAL = Residential Assessment Level, C/I = Commercial/Industrial
6. J = Estimated value, < = not detected at the specified detection limit, JL = estimated value, biased low, R = rejected.
7. MW-32A was screened in the B-CZ & replaced with MW-32AR
8. Based on historical data, MW-25A and MW-25C were likely mislabeled in March 2018 and results are provided correctly in this table.

TABLE 2

Notes:

1. All values in milligrams per liter (mg/L).
2. Concentrations > RAL and non-detects are highlighted light gray.
3. Concentrations > C/I AL and non-detects are highlighted dark gray
4. TRRP Protective Concentration Limits (PCLs) (30 TAC §350, Table 3), updated January 2021.
5. RAL = Residential Assessment Level, C/I = Commercial/Industrial
6. J = Estimated value, < = not detected at the specified detection limit, JL = estimated value, biased low, R = rejected.
7. MW-32A was screened in the B-CZ & replaced with MW-32AR
8. Based on historical data, MW-25A and MW-25C were likely mislabeled in March 2018 and results are provided correctly in this table.

Notes:

1. All values in milligrams per liter (mg/L).
2. Concentrations > RAL and non-detects are highlighted light gray.
3. Concentrations > C/I AL and non-detects are highlighted dark gray
4. TRRP Protective Concentration Limits (PCLs) (30 TAC §350, Table 3), updated January 2021.
5. RAL = Residential Assessment Level, C/I = Commercial/Industrial
6. J = Estimated value, < = not detected at the specified detection limit, JL = estimated value, biased low, R = rejected.
7. MW-32A was screened in the B-CZ & replaced with MW-32AR
8. Based on historical data, MW-25A and MW-25C were likely mislabeled in March 2018 and results are provided correctly in this table.

Notes:

1. All values in milligrams per liter (mg/L).
2. Concentrations > RAL and non-detects are highlighted light gray.
3. Concentrations > C/I AL and non-detects are highlighted dark gray
4. TRRP Protective Concentration Limits (PCLs) (30 TAC §350, Table 3), updated January 2021.
5. RAL = Residential Assessment Level, C/I = Commercial/Industrial
6. J = Estimated value, < = not detected at the specified detection limit, JL = estimated value, biased low, R = rejected.
7. MW-32A was screened in the B-CZ & replaced with MW-32AR
8. Based on historical data, MW-25A and MW-25C were likely mislabeled in March 2018 and results are provided correctly in this table.

Notes:

1. All values in milligrams per liter (mg/L).
2. Concentrations > RAL and non-detects are highlighted light gray.
3. Concentrations > C/I AL and non-detects are highlighted dark gray
4. TRRP Protective Concentration Limits (PCLs) (30 TAC §350, Table 3), updated January 2021.
5. RAL = Residential Assessment Level, C/I = Commercial/Industrial
6. J = Estimated value, < = not detected at the specified detection limit, JL = estimated value, biased low, R = rejected.
7. MW-32A was screened in the B-CZ & replaced with MW-32AR
8. Based on historical data, MW-25A and MW-25C were likely mislabeled in March 2018 and results are provided correctly in this table.

TABLE 2
ANALYTICAL RESULTS SUMMARY (2008 - 2024)

Notes:

1. All values in milligrams per liter (mg/L).
2. Concentrations > RAL and non-detects are highlighted light gray.
3. Concentrations > C/I AL and non-detects are highlighted dark gray
4. TRRP Protective Concentration Limits (PCLs) (30 TAC §350, Table 3), updated January 2021.
5. RAL = Residential Assessment Level, C/I = Commercial/Industrial
6. J = Estimated value, < = not detected at the specified detection limit, JL = estimated value, biased low, R = rejected.
7. MW-32A was screened in the B-CZ & replaced with MW-32AR
8. Based on historical data, MW-25A and MW-25C were likely mislabeled in March 2018 and results are provided correctly in this table.

TABLE 2
ANALYTICAL RESULTS SUMMARY (2008 - 2024)

Notes:

1. All values in milligrams per liter (mg/L).
2. Concentrations > RAL and non-detects are highlighted light gray.
3. Concentrations > C/I AL and non-detects are highlighted dark gray
4. TRRP Protective Concentration Limits (PCLs) (30 TAC §350, Table 3), updated January 2021.
5. RAL = Residential Assessment Level, C/I = Commercial/Industrial
6. J = Estimated value, < = not detected at the specified detection limit, JL = estimated value, biased low, R = rejected.
7. MW-32A was screened in the B-CZ & replaced with MW-32AR
8. Based on historical data, MW-25A and MW-25C were likely mislabeled in March 2018 and results are provided correctly in this table.

Notes:

1. All values in milligrams per liter (mg/L).
2. Concentrations > RAL and non-detects are highlighted light gray.
3. Concentrations > C/I AL and non-detects are highlighted dark gray
4. TRRP Protective Concentration Limits (PCLs) (30 TAC §350, Table 3), updated January 2021.
5. RAL = Residential Assessment Level, C/I = Commercial/Industrial
6. J = Estimated value, < = not detected at the specified detection limit, JL = estimated value, biased low, R = rejected.
7. MW-32A was screened in the B-CZ & replaced with MW-32AR
8. Based on historical data, MW-25A and MW-25C were likely mislabeled in March 2018 and results are provided correctly in this table.

TABLE 2

Notes:

1. All values in milligrams per liter (mg/L).
2. Concentrations > RAL and non-detects are highlighted light gray.
3. Concentrations > C/I AL and non-detects are highlighted dark gray
4. TRRP Protective Concentration Limits (PCLs) (30 TAC §350, Table 3), updated January 2021.
5. RAL = Residential Assessment Level, C/I = Commercial/Industrial
6. J = Estimated value, < = not detected at the specified detection limit, JL = estimated value, biased low, R = rejected.
7. MW-32A was screened in the B-CZ & replaced with MW-32AR
8. Based on historical data, MW-25A and MW-25C were likely mislabeled in March 2018 and results are provided correctly in this table.

Notes:

1. All values in milligrams per liter (mg/L).
2. Concentrations > RAL and non-detects are highlighted light gray.
3. Concentrations > C/I AL and non-detects are highlighted dark gray
4. TRRP Protective Concentration Limits (PCLs) (30 TAC §350, Table 3), updated January 2021.
5. RAL = Residential Assessment Level, C/I = Commercial/Industrial
6. J = Estimated value, < = not detected at the specified detection limit, JL = estimated value, biased low, R = rejected.
7. MW-32A was screened in the B-CZ & replaced with MW-32AR
8. Based on historical data, MW-25A and MW-25C were likely mislabeled in March 2018 and results are provided correctly in this table.

Notes:

1. All values in milligrams per liter (mg/L).
2. Concentrations > RAL and non-detects are highlighted light gray.
3. Concentrations > C/I AL and non-detects are highlighted dark gray
4. TRRP Protective Concentration Limits (PCLs) (30 TAC §350, Table 3), updated January 2021.
5. RAL = Residential Assessment Level, C/I = Commercial/Industrial
6. J = Estimated value, < = not detected at the specified detection limit, JL = estimated value, biased low, R = rejected.
7. MW-32A was screened in the B-CZ & replaced with MW-32AR
8. Based on historical data, MW-25A and MW-25C were likely mislabeled in March 2018 and results are provided correctly in this table.

TABLE 2

Notes:

1. All values in milligrams per liter (mg/L).
2. Concentrations > RAL and non-detects are highlighted light gray.
3. Concentrations > C/I AL and non-detects are highlighted dark gray
4. TRRP Protective Concentration Limits (PCLs) (30 TAC §350, Table 3), updated January 2021.
5. RAL = Residential Assessment Level, C/I = Commercial/Industrial
6. J = Estimated value, < = not detected at the specified detection limit, JL = estimated value, biased low, R = rejected.
7. MW-32A was screened in the B-CZ & replaced with MW-32AR
8. Based on historical data, MW-25A and MW-25C were likely mislabeled in March 2018 and results are provided correctly in this table.

TABLE 2
ANALYTICAL RESULTS SUMMARY (2008 - 2024)

Notes:

1. All values in milligrams per liter (mg/L).
2. Concentrations > RAL and non-detects are highlighted light gray.
3. Concentrations > C/I AL and non-detects are highlighted dark gray
4. TRRP Protective Concentration Limits (PCLs) (30 TAC §350, Table 3), updated January 2021.
5. RAL = Residential Assessment Level, C/I = Commercial/Industrial
6. J = Estimated value, < = not detected at the specified detection limit, JL = estimated value, biased low, R = rejected.
7. MW-32A was screened in the B-CZ & replaced with MW-32AR
8. Based on historical data, MW-25A and MW-25C were likely mislabeled in March 2018 and results are provided correctly in this table.

TABLE 2
ANALYTICAL RESULTS SUMMARY (2008 - 2024)

Notes:

1. All values in milligrams per liter (mg/L).
2. Concentrations > RAL and non-detects are highlighted light gray.
3. Concentrations > C/I AL and non-detects are highlighted dark gray
4. TRRP Protective Concentration Limits (PCLs) (30 TAC §350, Table 3), updated January 2021.
5. RAL = Residential Assessment Level, C/I = Commercial/Industrial
6. J = Estimated value, < = not detected at the specified detection limit, JL = estimated value, biased low, R = rejected.
7. MW-32A was screened in the B-CZ & replaced with MW-32AR
8. Based on historical data, MW-25A and MW-25C were likely mislabeled in March 2018 and results are provided correctly in this table.

Notes:

1. All values in milligrams per liter (mg/L).
2. Concentrations > RAL and non-detects are highlighted light gray.
3. Concentrations > C/I AL and non-detects are highlighted dark gray
4. TRRP Protective Concentration Limits (PCLs) (30 TAC §350, Table 3), updated January 2021.
5. RAL = Residential Assessment Level, C/I = Commercial/Industrial
6. J = Estimated value, < = not detected at the specified detection limit, JL = estimated value, biased low, R = rejected.
7. MW-32A was screened in the B-CZ & replaced with MW-32AR
8. Based on historical data, MW-25A and MW-25C were likely mislabeled in March 2018 and results are provided correctly in this table.

Notes:

1. All values in milligrams per liter (mg/L).
2. Concentrations > RAL and non-detects are highlighted light gray.
3. Concentrations > C/I AL and non-detects are highlighted dark gray
4. TRRP Protective Concentration Limits (PCLs) (30 TAC §350, Table 3), updated January 2021.
5. RAL = Residential Assessment Level, C/I = Commercial/Industrial
6. J = Estimated value, < = not detected at the specified detection limit, JL = estimated value, biased low, R = rejected.
7. MW-32A was screened in the B-CZ & replaced with MW-32AR
8. Based on historical data, MW-25A and MW-25C were likely mislabeled in March 2018 and results are provided correctly in this table.

Metals																			
Arsenic	*0.01*	*0.01*																	

Notes:

1. All values in milligrams per liter (mg/L).
2. Concentrations > RAL and non-detects are highlighted light gray.
3. Concentrations > C/I AL and non-detects are highlighted dark gray
4. TRRP Protective Concentration Limits (PCLs) (30 TAC §350, Table 3), updated January 2021.
5. RAL = Residential Assessment Level, C/I = Commercial/Industrial
6. J = Estimated value, < = not detected at the specified detection limit, JL = estimated value, biased low, R = rejected.
7. MW-32A was screened in the B-CZ & replaced with MW-32AR
8. Based on historical data, MW-25A and MW-25C were likely mislabeled in March 2018 and results are provided correctly in this table.

TABLE 2
ANALYTICAL RESULTS SUMMARY (2008 - 2024)
CLASS 2 GROUNDWATER

Notes:

1. All values in milligrams per liter (mg/L).
2. Concentrations > RAL and non-detects are highlighted light gray.
3. Concentrations > C/I AL and non-detects are highlighted dark gray
4. TRRP Protective Concentration Limits (PCLs) (30 TAC §350, Table 3), updated January 2021.
5. RAL = Residential Assessment Level, C/I = Commercial/Industrial
6. J = Estimated value, < = not detected at the specified detection limit, JL = estimated value, biased low, R = rejected.
7. MW-32A was screened in the B-CZ & replaced with MW-32AR
8. Based on historical data, MW-25A and MW-25C were likely mislabeled in March 2018 and results are provided correctly in this table.

Notes:

1. All values in milligrams per liter (mg/L).
2. Concentrations > RAL and non-detects are highlighted light gray.
3. Concentrations > C/I AL and non-detects are highlighted dark gray
4. TRRP Protective Concentration Limits (PCLs) (30 TAC §350, Table 3), updated January 2021.
5. RAL = Residential Assessment Level, C/I = Commercial/Industrial
6. J = Estimated value, < = not detected at the specified detection limit, JL = estimated value, biased low, R = rejected.

Notes:

1. All values in milligrams per liter (mg/L).
2. Concentrations > RAL and non-detects are highlighted light gray.
3. Concentrations > C/I AL and non-detects are highlighted dark gray
4. TRRP Protective Concentration Limits (PCLs) (30 TAC §350, Table 3), updated January 2021.
5. RAL = Residential Assessment Level, C/I = Commercial/Industrial
6. J = Estimated value, < = not detected at the specified detection limit, JL = estimated value, biased low, R = rejected.

Notes:

1. All values in milligrams per liter (mg/L).
2. Concentrations > RAL and non-detects are highlighted light gray.
3. Concentrations > C/I AL and non-detects are highlighted dark gray
4. TRRP Protective Concentration Limits (PCLs) (30 TAC §350, Table 3), updated January 2021.
5. RAL = Residential Assessment Level, C/I = Commercial/Industrial
6. J = Estimated value, < = not detected at the specified detection limit, JL = estimated value, biased low, R = rejected.

Notes:

1. All values in milligrams per liter (mg/L).
2. Concentrations > RAL and non-detects are highlighted light gray.
3. Concentrations > C/I AL and non-detects are highlighted dark gray
4. TRRP Protective Concentration Limits (PCLs) (30 TAC §350, Table 3), updated January 2021.
5. RAL = Residential Assessment Level, C/I = Commercial/Industrial
6. J = Estimated value, < = not detected at the specified detection limit, JL = estimated value, biased low, R = rejected.

TABLE 3

Notes:

1. All values in milligrams per liter (mg/L).
2. Concentrations > RAL and non-detects are highlighted light gray.
3. Concentrations > C/I AL and non-detects are highlighted dark gray
4. TRRP Protective Concentration Limits (PCLs) (30 TAC §350, Table 3), updated January 2021.
5. RAL = Residential Assessment Level, C/I = Commercial/Industrial
6. J = Estimated value, < = not detected at the specified detection limit, JL = estimated value, biased low, R = rejected.

Notes:

1. All values in milligrams per liter (mg/L).
2. Concentrations > RAL and non-detects are highlighted light gray.
3. Concentrations > C/I AL and non-detects are highlighted dark gray
4. TRRP Protective Concentration Limits (PCLs) (30 TAC §350, Table 3), updated January 2021.
5. RAL = Residential Assessment Level, C/I = Commercial/Industrial
6. J = Estimated value, < = not detected at the specified detection limit, JL = estimated value, biased low, R = rejected.

Notes:

1. All values in milligrams per liter (mg/L).
2. Concentrations > RAL and non-detects are highlighted light gray.
3. Concentrations > C/I AL and non-detects are highlighted dark gray
4. TRRP Protective Concentration Limits (PCLs) (30 TAC §350, Table 3), updated January 2021.
5. RAL = Residential Assessment Level, C/I = Commercial/Industrial
6. J = Estimated value, < = not detected at the specified detection limit, JL = estimated value, biased low, R = rejected.

Notes:

1. All values in milligrams per liter (mg/L).
2. Concentrations > RAL and non-detects are highlighted light gray.
3. Concentrations > C/I AL and non-detects are highlighted dark gray
4. TRRP Protective Concentration Limits (PCLs) (30 TAC §350, Table 3), updated January 2021.
5. RAL = Residential Assessment Level, C/I = Commercial/Industrial
6. J = Estimated value, < = not detected at the specified detection limit, JL = estimated value, biased low, R = rejected.

1040		6.95	2.90	27.66	6.10	0.232	4.07	-78	37.6

Purging was completed based on: ☐ stabilization of water quality parameters ☐ removal of three well volumes ☐ removal of at least one half well volume (low yield well)

Bottles Collected				Filtration	Preserved	Notes and Observations
Time	Volume	Composition (G / P)	No.	(10µm / 45µm)	(type)	(quality control sample, other)
1100	120, 40mL, 1L	G,P	6	☑ filtered ☐ unfiltered	HNO3	SVOC, VOC
				☐ filtered ☐ unfiltered		

Notes: record time at which purging is started. For low flow sampling, recommended stabilization criteria: temp ± 0.5°C; pH ± 0.1 units; conductivity ± 3%; DO ± 1 mg/L; ORP ± 10 mV; for at least three successive measurements that are made every 3-5 minutes with <1 foot of stable draw down.

Unless otherwise noted, groundwater sample collection was completed in accordance with the applicable requirements of Golder's Quality Assurance Program and Standard Operating Procedure ☐ 9 Conventional Groundwater Sample Collection ☑ 10 Low Flow Groundwater Sample Collection.

1049	↓	~7.8	10.18	30.23	6.34	0.498	0.37	-162	0.0

Purging was completed based on: ☑ stabilization of water quality parameters ☐ removal of three well volumes ☐ removal of at least one half well volume (low yield well)

Bottles Collected				Filtration (10µm / 45µm)	Preserved (type)	Notes and Observations (quality control sample, other)
Time	Volume	Composition (G / P)	No.			
1105	40mL, 1L	G, G	3, 2	☐ filtered ☑ unfiltered	HCL, none	VOCs, SVOC
1105	120mL	P	1	☐ filtered ☑ unfiltered	HNO3	metal

Notes: record time at which purging is started. For low flow sampling, recommended stabilization criteria: temp ± 0.5°C; pH ± 0.1 units; conductivity ± 3%; DO ± 1 mg/L; ORP ± 10 mV; for at least three successive measurements that are made every 3-5 minutes with <1 foot of stable draw down.

Unless otherwise noted, groundwater sample collection was completed in accordance with the applicable requirements of Golder's Quality Assurance Program and Standard Operating Procedure ☐ 9 Conventional Groundwater Sample Collection ☑ 10 Low Flow Groundwater Sample Collection.

Standard volume capacity of monitoring wells: Schedule 40 PVC (1-inch OD, 0.04 gallons/foot; 2-inch OD, 0.16 gallons/foot; 4-inch OD, 0.65 gallons/foot)

Time	Purge Rate (L/min)	Cumulative Purge Volume (L)	Depth to Water (ft)	Temp (°C) ☐ NM	pH ☐ NM	Conductivity (µS/m or mS/cm) ☐ not measured	Dissolved Oxygen (mg/L) ☐ not measured	Redox Potential (mV) ☐ not measured	Turbidity (NTU) ☐ NM
1618	.2	0	starting purge						
1628	↓	↓	4.33	31.35	6.41	1.88	3.44	84	16.0
1633			4.35	31.32	6.40	1.88	3.23	88	9.6
1638			4.36	31.27	6.40	1.87	2.99	91	5.6
1643		~~7~~ 7.57	4.37	31.39	6.40	1.87	2.97	92	3.2

Purging was completed based on: ☑ stabilization of water quality parameters ☐ removal of three well volumes ☐ removal of at least one half well volume (low yield well)

Bottles Collected				Filtration	Preserved	Notes and Observations
Time	Volume	Composition (G / P)	No.	(10µm / 45µm)	(type)	(quality control sample, other)
1700	40mL, 1L	G, G	3, 2	☐ filtered ☑ unfiltered	HCL, None	VOCs, SVOCs
1700	120mL	P	1	☐ filtered ☑ unfiltered	HNO3	metals

Notes: record time at which purging is started. For low flow sampling, recommended stabilization criteria: temp ± 0.5°C; pH ± 0.1 units; conductivity ± 3%; DO ± 1 mg/L; ORP ± 10 mV; for at least three successive measurements that are made every 3-5 minutes with <1 foot of stable draw down.

Unless otherwise noted, groundwater sample collection was completed in accordance with the applicable requirements of Golder's Quality Assurance Program and Standard Operating Procedure ☐ 9 Conventional Groundwater Sample Collection ☑ 10 Low Flow Groundwater Sample Collection.

Field Team Leader Dominic Baptiste (name) _____ (signature)
